

# Oracle Video Server Road Map

Release 3.0

*Need information fast?*

*This Road Map will point  
you in the right direction.*

**ORACLE®**  
Enabling the Information Age™

## Welcome to the Oracle Video Server

This Road Map is your guide to the Oracle Video Server documentation library. It points you toward the information you need by linking common tasks to a specific video server document.

## The information you need

Each document in the Oracle Video Server documentation library focuses on different tasks associated with installing and operating the Oracle Video Server system. Whether you are a system administrator, content administrator, application developer, or content provider, you will find information to help you do your job more efficiently.

The Oracle Video Server documentation library is also available online in Adobe® Acrobat™ (PDF) format. The PDF files are readable with the Adobe Acrobat Reader™ and can be easily printed. The online documentation is included on the Oracle Video Server, Oracle Video Client and Oracle Video Server Manager distribution CDs.

For instructions on how to access the online documentation and to install the necessary viewing software, refer to the *Oracle Video Server Installation Guide*, getting started with *Oracle Video Server Manager*, or the Oracle Video Client CD booklet.

The Oracle Video Server documentation is also available from our Web site (<http://www.oracle.com/products/asd/video/video.html>). Besides documentation, this Web site offers you several other important resources:

- Interactive technical support
- Software and documentation updates
- Oracle Video Server message board and discussion group
- Sample system configurations and encoded content
- Marketing information
- Links to the Web sites of our partners
