

**Architectural Coatings****REZ® Interior Polyurethane Satin Varnish****Generic Type****Tinting and Base Information**

Oil Modified Urethane Resin

DO NOT TINT.

77-9

Clear

General Description

Our premium satin varnish polyurethane is formulated to meet the performance requirements of the residential and commercial markets. REZ® Interior Polyurethane Satin Varnish is an oil modified urethane based, clear coating that provides abrasion resistance on interior wood surfaces, including floors. Recommended for use on wall paneling, doors, bar tops, wood cabinets and floors.

Recommended Uses

Doors
Floors
Paneling
Furniture

Features / Benefits

Excellent Adhesion
Abrasion- and Scuff-Resistant
Tough, Durable Urethane Formula
Excellent Washability

Limitations of Use

Apply when air, surface and product temperatures are above 50°F (10°C). Recommended for interior surfaces only. Do not attempt to use on prewaxed wood flooring. Follow flooring manufacturer's coating recommendations. These products are not intended for immersion service, resistance to chemicals or other extreme conditions. Not recommended in situations characterized by high heat or presence of corrosive chemicals nor for heavy duty use on floors. Allow 24 hours before putting into service. Allow floors 72 hours before putting into full service.

Product Data

Gloss: Satin: 20 to 40 (60°Gloss Meter)
VOC*: 4.16 lbs/gal (499.00 g/L)
DFT: 0.80 minimum to 1.10 maximum mils
Coverage: 500 to 700 sq. ft./gal. (46 to 65 sq. m/3.78L)

Note: Does not include loss due to varying application method, surface porosity, or mixing.

Volume Solids*: 35.9% +/- 2.0%

Weight Solids*: 44.4% +/- 2.0%

Viscosity: 15 to 30 sec., Ford #4 Cup

Weight/Gallon: 7.5 lbs. (3.4 kg) +/- 0.2 lbs. (91 g)

Cleanup*: Leptyne Paint Thinner 21-263

*Product data calculated on product 77-9.

Drying Time:

To Touch: 1 - 2 hours

To Handle: 4 hours

To Recoat: 4 hours

To Full Cure: 24 hours

Dry Time @77°F (25°C); 50% relative humidity

Flash Point: 103°F, (39.4°C)

Architectural Coatings

REZ® Interior Polyurethane Satin Varnish

General Surface Preparation

The surface must be dry and completely free from dirt, grease, and wax. Putty all nail holes, end-joints, and other openings to match the color of the wood. Sand surface to remove surface imperfections and gloss of old finish coats. To refinish surfaces in poor or questionable condition, completely remove the old finish and treat as for new wood. Lightly sand or steel wool between coats. Use a tack cloth to remove the dust that is generated by sanding. If previous coat is shellac, lacquer, or paste wood filler, apply a coat of REZ® Sealer-Primer, 77-1, before finishing. Seal all bare wood surfaces with REZ® Sealer-Primer, 77-1.

Recommended Primers

Wood 77-1, 77-30

Directions for Use

Stir thoroughly. Read all label and Material Safety Data Sheet (MSDS) information prior to use. MSDS are available through our website or by calling 1-800-441-9695.

Permissible temperatures during application:

Material:	50 to 90°F	10 to 32°C
Ambient:	50 to 100°F	10 to 38°C
Substrate:	50 to 100°F	10 to 38°C

PPGAF believes the technical data presented is currently accurate; however, no guarantee of accuracy, comprehensiveness, or performance is given or implied. Improvements in coatings technology may cause future technical data to vary from what is in this bulletin. For complete, up-to-date technical information, visit our web site or call 1-800-441-9695.

Application Information

Recommended Spread Rates:

Wet Mils :	2.3 minimum to	3.2 maximum
Wet Microns:	58.4 minimum to	81.3 maximum
Dry Mils :	0.8 minimum to	1.1 maximum
Dry Microns:	20.3 minimum to	28.0 maximum

Application Equipment: Apply with a high quality brush or spray equipment.

Airless Spray: Pressure 1850 psi, tip, 0.013 - 0.019"

Brush: High Quality Natural Bristle Brush

Roller: Not Recommended.

Thinning:

DO NOT THIN.

Packaging: Quart (946 mL)

Not all products are available in all sizes.
