

**Architectural Coatings****PITTSBURGH® Paints Interior Latex Glaze****Generic Type****Tinting and Base Information**

Acrylic Latex

Choose a base coat color and a color to be blended with the glaze to achieve the desired final appearance. Mix ratio is 1 part paint to 4 parts glaze.

17-50 Clear Blending Glaze

General Description

Our Interior Latex Glaze is a water-based, translucent finish designed to be blended with selected PITTSBURGH® Paints latex products to create decorative color or “faux” finishes. This product can be used with the following PITTSBURGH® Paints latex base paints: WALLHIDE® Interior Latex Eggshell, SATINHIDE® Interior Latex Lo-Lustre, MANOR HALL® Interior Eggshell and Interior Semi-Gloss. Use with decorative application tools, such as sponges, rags, brushes and combs to create special effects.

Recommended Uses

Doors
Painted Furniture
Walls
Ceilings
Trim

Features / Benefits

Excellent Durability
Water-based, Acrylic Formula
Easy Blending and Application
Soap & Water Clean-Up

Limitations of Use

Apply when air, product, and surface temperatures are above 50°F (10°C). Protect from freezing. Do not use on floors, decks, or other underfoot areas. Freshly glazed surface may be washed after 30 days. Glaze remains workable for 20 minutes. Working time is reduced when opacity is increased.

Product Data

Gloss: Translucent
VOC*: 2.05 lbs/gal (246.00 g/L)
Coverage: 400 to 450 sq. ft./gal. (37 to 42 sq. m/3.78L)
Note: Does not include loss due to varying application method, surface porosity, or mixing.
Volume Solids*: 25% +/- 2.0%
Weight Solids*: 36.7% +/- 2.0%
Viscosity: 75 to 85 KU
Weight/Gallon: 9.9 lbs. (4.5 kg) +/- 0.2 lbs. (91 g)
Cleanup*: Soap and Water
*Product data calculated on product 17-50.

Drying Time:

To Touch: 30 minutes
To Handle: 1 hour
To Recoat: 48 hours
To Full Cure: 30 days

Dry Time @77°F (25°C); 50% relative humidity

Flash Point: Over 200°F, (93°C)

Architectural Coatings

PITTSBURGH® Paints Interior Latex Glaze

General Surface Preparation

Surface to be painted must be clean, dry, smooth, and free from dirt, grease, powdery or peeling paint, and other surface contaminants. All cracks and other surface imperfections must be repaired using high quality patching compounds, then allowed to dry thoroughly. Repaired areas should be sanded smooth and then spot-primed. Slick or glossy surfaces of previously applied paint, in sound condition, must be dulled by sanding.

Prime all bare wood, plaster, masonry, metal, patched and porous surfaces with the appropriate primer.

NEW WOOD: New wood should be sanded smooth and wiped clean. Any knots or resinous areas should be sealed before painting. Countersink all nails. Putty flush with surface, then prime.

NEW PLASTER: Fresh plaster, hardcoat, skim coat, or other alkaline surfaces should be allowed to cure for at least 30 days prior to priming with an alkali resistant primer.

WATER-SOLUBLE STAINS: Apply SEAL-GRIP® Primer 17-21 or 17-31, over stained area prior to coating, to avoid bleeding of the stain into the topcoat.

DECORATIVE PAINT STYLES: Select a style and practice the technique on a sample board. Prime and paint base coat color on the sample board. Allow to dry. Use the appropriate tool to practice desired look. Refer to PITTSBURGH® Paints Paint Techniques: A Step-by-Step Guide (P13465) for methods of application, styles, and tips.

MIX RATIO: 1 part paint to 4 parts glaze

Recommended Primers

Wood	6-855, 6-6, 17-21
Drywall	6-2, 17-21
Plaster	6-603

Directions for Use

Stir paint and glaze mixture until thoroughly blended. Read all label and Material Safety Data Sheet (MSDS) information prior to use. MSDS are available through our website or by calling 1-800-441-9695.

Permissible temperatures during application:

Material:	50 to 90°F	10 to 32°C
Ambient:	50 to 100°F	10 to 38°C
Substrate	50 to 100°F	10 to 38°C

PPGAF believes the technical data presented is currently accurate; however, no guarantee of accuracy, comprehensiveness, or performance is given or implied. Improvements in coatings technology may cause future technical data to vary from what is in this bulletin. For complete, up-to-date technical information, visit our web site or call 1-800-441-9695.

Application Information

Recommended Spread Rates:

Wet Mil : minimum to	maximum
Wet Microns: minimum to	maximum
Dry Mil : minimum to	maximum
Dry Microns: minimum to	maximum

Application Equipment: Use with decorative application tools such as brushes, sponges, rags, and combs to create special effects.

Brush: Decorative Application Tools

Thinning:

For easier application, thin with no more than one pint (473 mL) water per gallon (3.78L) of glaze.

Packaging: 1-Gallon (3.78L)
Quart (946 mL)

Not all products are available in all sizes.
