Advanced Uninstaller PRO 2003

ver. 5.4 Shareware (April 5th 2003)

This new version combines the new revolutionary design with the power of more then 10 new modules that were just added. A lot of new features are available now to offer you an improved experience.

Keep your computer running faster and cleaner by using this new suite. Find and remove files left behind on your system by different programs and optimize your system's performance in just a few clicks. Why wait? Do it right now!

Keep sensitive information secure by eliminating the tracks you would usually leave behind. Use the Quick Cleaner wizard to remove these files and data. Remove invalid Start Menu and Desktop shortcuts, and clean up your working space. Advanced Uninstaller PRO 2003 also lets you choose what programs run at system startup. From a single window you can disable / enable programs that were installed in the StartUp menu or in the Windows registry.

…and many many more!

Easily access this new version of Advanced Uninstaller PRO 2003 by using its Control Panel applet!

This program is designed to run on a Microsoft Windows 95/98/ME/NT/2000/XP OS.
