

README.HTM - This file contains information about BlindRead and Blindwrite software.  
check [release\\_comments.htm](#) to take a look at the latest release comments.

## **QUICK DESCRIPTION**

Blindread is a CD extraction software, capable to read almost any kind of CD.  
Blindwrite is a CD Recording software, capable to reproduce most kind of CD.

## **MANUAL**

the manual is [manual\\_eng.chm](#) – you must have IE 4.0 installed to read the manual

## **COPYRIGHTS**

By its unique feature, Blindwrite are the perfect tools to clone almost any kind of CD, even if they are protected against copy. But you must keep in mind before cloning a CD, you MUST be allowed to do so. If you are unsure about your rights, please contact your local law advisor.

Under the strongest form, we forbid the unauthorized reproduction of any copyrighted material. Our users shall make a difference between reproducing a copy-protected CD (which is often perfectly legal as a personal backup purpose), and providing copies to anyone which doesn't own the original (thus violating the copyright laws, and being exposed to serious consequences).

Once you sell or give the original of a copyrighted CD, you must destroy any remaining copies of this CD.

Local laws and regulations about copyrighted materials may vary. Please check your local advisor if you are unsure.

## **COMPATIBILITY**

Blindread currently generates CD images of the following format

Blindwrite (File \*.BWT - the CD description , \*.BWI - the CD image and eventually, \*.BWS -  
The CD subcodes)

Blindwrite currently use CD images of the following format

Blindwrite (\*.BWT)
