

Super Flexible File Synchronizer

Version 2.00

Product Description

This software is used to back up data and to synchronize PCs, servers, and notebooks. The settings are stored in multiple profiles, and the software comes with support for FTP servers, ZIP compression, data encryption, and a scheduler for automated backups. This program features the ability to freely select files and folders across the whole folder hierarchy in tree-views and it has support for e-mail notification, profile categories, and various filters.

Awards

- Editor's recommendation in PC Prof. Magazine, German Edition July 2004 (v1.63)
- Rated 5 on TuCows (v1.x)
- Rated 4 on download.com with detailed online review (v1.68)
