

# Madesafe Spyware

## **Cleaner**

To start the cleaner program, first select the drive to clean, then select your options and finally click the “Start Clean” button. You may halt this operation by clicking “Stop Clean”.

## **Pop-up**

As well as blocking windows and Messenger Pop-ups, there is a range of cleaner features

**Spyware/Adware** – Detects and Removes Spyware and Adware found on your PC.

**Internet History** – Clear all previously visited web pages. Including the cleaning of the index.dat file (This file is created by Windows and cannot be removed, madesafe will clear the contents)

**Internet Cookies** – Cookies are recorded information about your Internet movements. This improves the browser’s performance to load previously visited web pages quicker.

**Internet caches** – This runs hand in hand with Internet Cookies, previously visited web pages are pre loaded to enable quicker loading.

**Internet Logs** – Log files

**Typed URL’s** – URL’s that are typed directly into the address bar are removed.

**ICQ chat logs.** – Log files cleaned generated by ICQ chat

**Program Temp** – Cleans temporary install files

**Program History** – Clears installation history

**Install Logs** – Cleans installation logs

**Recycle Bin** – Erases recycle bin contents

**Windows History** – Cleans windows history

**Windows Temp** – Clears Windows temp directory

**Find** – Cleans the find history

**Find Computers** - Cleans the find history

**Recent Docs** – Cleans all recently opened/ viewed documents

**Run Task** – clears all recently run applications.

**Clean On Exit** – Clean selected options on exit

**Start with Windows** – Start the clean function with Windows start up.

**Print Log** – To view the cleaned files, click this option to print the cleaner operation log.

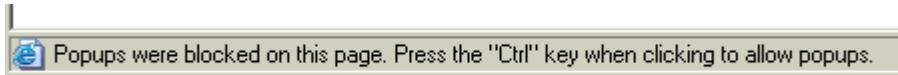

**Pop-up Killer Enabled** – To enable the “pop-up function” make sure the option is selected in the cleaner options window. Then minimise the window; this will place an icon in the taskbar.

Pop-up Killer minimised and running

To view a blocked pop-up killer window, simply press and hold “Ctrl” button on the keyboard to view the blocked window.

A message will be displayed in the bottom of the IE window.  
See below.
