We start the year as we mean to go on, offering a host of practical programs. Illuminatus lets you create top-quality presentations in a flash, FileBox Xtender is a handy desktop windows organiser, while LapLink Technical is the ideal solution for the mobile office worker. Plus, our exclusive DVD video looks at the history of sport, covering memorable moments, venues and tragedies

The easy way to load the programs

- 1 Insert the disc into your CD-ROM drive. The *PC Advisor* main menu screen should appear after a few seconds.
- 2 Click on the name of the program you want to load and choose the installation option you require. The program should automatically run from the Start menu.
- 3 If you experience any problems, refer to the instructions at the end of the article or see the related Read Me file. If the program still won't load visit our website or call the helpline. Please remember that *PC Advisor* can only assist with installation problems. For DVD instructions see page 281.

Problems with the cover disc?

Visit www.pcadvisor.co.uk or call the cover disc helpline on 0870 739 7630

If you've missed any of our DVDs, you can order them for just £2.50 each including p&p (UK only). Call 01795 414 939 to order using your credit card

The first *PC Advisor* cover disc of 2002 includes plenty of useful programs to help you use your PC more effectively – whether it's at home or work. Remaining in contact with the office while you're on the road is essential if you want to keep up to date with your business' latest developments. LapLink Technical gives you a number of ways to link up two computers in different locations, allowing you to transfer and copy files easily, so vital data is always just a mouse-click away.

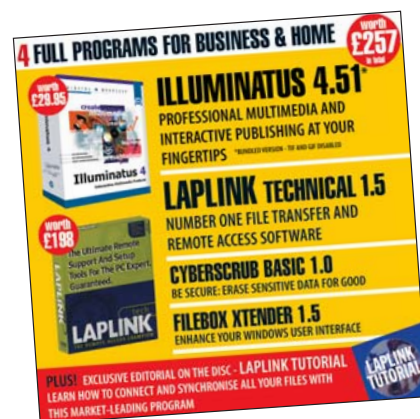

Our next full program, Illuminatus 4.51, is a superb application, helping you create impressive, high-quality presentations that will give your business the edge over its competitors and stun bosses and colleagues alike.

Information integrity

FileBox Xtender ensures you always have the required information at your fingertips, cutting out the irritating procedure of repeatedly moving between windows. Simply select, or 'pin', the window you want to have constantly on display. It then stays onscreen while you work on another window. The final full program is CyberScrub Basic, a utility that guarantees peace of mind when erasing sensitive data. CyberScrub puts deleted data beyond recovery, making sure it won't fall into the wrong hands.

DVD extras

If you've bought the DVD edition of *PC Advisor*, then you will get everything that the CD offers, plus a few extras. Not only can you experiment with plenty of added trial programs, you are also treated to the Games domain and our exclusive video, Story of Sport.

cover disc: CD

As ever, the *PC Advisor* cover disc contains a wealth of great programs for your PC. Along with the four full packages, we have compiled some useful utilities and trial software for your benefit.

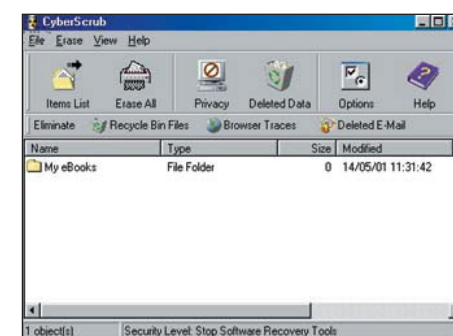

Our high-quality software will come in handy at work, home and on the road. Whether you want to keep in touch with colleagues while away from the office, make sure that sensitive data is deleted properly, create eye-catching presentations or keep a sneaky eye on the cricket scores while you're at work, there is something for everyone here.

LapLink Technical 1.5

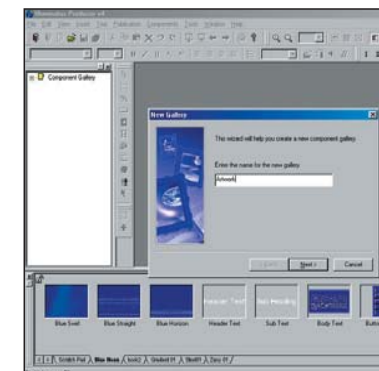

LapLink Technical is ideal if you travel around a lot but need to keep in touch with the office. You can transfer files between computers, remotely control another PC, print documents on printers attached to another system and communicate with someone on another machine. We have included a shockwave EXE file to help you get to grips with the program. Please note that LapLink Technical does not work with Windows 2000.

Illuminatus 4.51

Illuminatus is great if you want to create a presentation that includes various formats – you can include text, sound, video, animations and pictures. Plus, it's simple to understand, so you'll be creating top-notch presentations in no time at all.

→ CyberScrub (above) ensures that deleted items are wiped properly from your hard disk, while LapLink (right) lets you remotely share information and functions with another computer

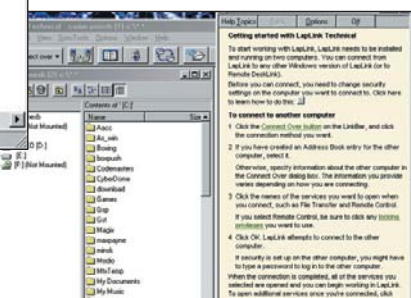

FileBox Xtender 1.5

FileBox Xtender lets you keep an eye on one desktop window while working in another – for example, you may need statistics from an Excel database while writing an important email. This way, you won't have to keep moving back and forth between the two windows, and you can be sure that the data is correct. FileBox also has a handy feature that lets you configure a set of onscreen shortcuts, which are available from a drop-down menu.

CyberScrub Basic 1.0

CyberScrub is essential if you store sensitive data on your PC that is regularly deleted. This peace-of-mind program ensures that erased items are completely wiped from your system. It effects a range of security measures, ensuring your data is fully removed. First it destroys the data, then it wipes the free spaces on your disk and scrubs file 'slack', the little corners of your disk filled with random information. Simply drag and drop unwanted files into the CyberScrub window and the data will be put beyond recovery.

← You can create professional-looking, impressive presentations with Illuminatus 4.51

↑ FileBox Xtender 1.5 will keep important windows at the front of your desktop, while you work in other windows behind

cover disc: DVD

The January 2002 DVD edition of *PC Advisor* offers everything that is on the CD-ROM, plus some extra goodies. The four full programs are all here, as well as an extra full program and some added trial software programs and demos of the latest games. But the main feature of the DVD is our exclusive video, *Story of Sport*.

A century of highlights

Story of Sport charts the early development of the modern world of sport by taking a look at the greatest sporting moments from the beginning of this century up to the late 1960s.

The first chapter, *Golden Years*, includes footage of that famous day in 1966 when England beat West Germany in the World Cup final. However, the action isn't just confined to that momentous occasion. This chapter also includes a link to footage on the boxing legend, Mohammed Ali. This interesting film will clearly illustrate why he is viewed as the greatest boxer of all time.

↓→ Our exclusive DVD film features the highs and lows of 20th century sport

The stage takes centre stage

The second chapter looks at great sporting venues around the world, with Wembley taking pride of place among the many great stadia. There's a link to some of the bloopers and howlers from sport. Finally, the video looks at the

darker side of sport, concentrating on tragedies that have blighted football and motor racing in particular. ■
