Physical and virtual PC security come courtesy of Internet Security Suite and Web-Guard – just two of our four full programs this month. And once you've used WebCompiler to present your website, you can get to grips with your accounts thanks to Ritz 2002

## The easy way to load the programs

**1** Insert the disc into your CD-ROM drive. The *PC Advisor* main menu screen should appear on your screen after a few seconds.

**2** Click Continue at the Welcome screen. Running along the top of the next screen you will see a set of tabs, which you click on to access the various sections.

**3** Click on the section you want to view and then select the program you want to install. You will then see an Install button; click this to load up the program.

**4** If you experience any problems, refer to the manual instructions given or see the Read Me file. If the program still won't load visit our website or call the helpline. Please remember that *PC Advisor* can only assist with installation problems. For DVD instructions see page 179.

## Problems with the cover disc?

Visit [www.pcadvisor.co.uk](http://www.pcadvisor.co.uk)  
or call 0870 739 7630

If you've missed any of our DVDs, order them for £2.99 each inc p&p. Call 01795 414 939 to order using your credit card.

(UK only,  
subject to availability)

As well as the fully working, easy-to-use accounts package, Ritz 2002, our cover disc has three other full programs aimed at helping you harness the power of the web safely. To keep your private data safe from prying eyes, Internet Security Suite uses Stealth Encryption to guard your emails in transit and the package includes a free reader which you can send to the recipient so that they can view the contents of your message.

Internet Security Suite provides a Stealth Password Database for storing all your website passwords securely. Plus there's an application for controlling cookies – those little files that store themselves on your PC when you surf and report information back to the sites you've visited – and a children's version of Internet Explorer.

If you're worried about who's using your PC when you're not around, give Web-Guard a look. This package can log all activity on your PC, from keystrokes to internet usage. WebCompiler, meanwhile, lets you turn your website into an executable (EXE) file that can be burned to CD and sent to clients for viewing as an offline presentation.

## DVD extras

Readers with the DVD edition of the magazine can enjoy all of the above as well as our Games domain demos and exclusive video, Marvel Comics Superheroes. Featuring everyone's favourite goodfellows, Superman, Spiderman, Wonder Woman, the Incredible Hulk and more, this documentary provides an in-depth, 99-minute look at some of the most famous comicbook heroes. ■

## Cover disc liability

*The CD-ROM and DVD on the cover of PC Advisor are supplied as is, subject to the following terms and conditions. The CD-ROM and DVD are provided as free items to readers of PC Advisor for their personal use, and may not be resold or copied for distribution. The publisher shall have no liability without limitation for any losses or damage arising from using these software programs or taking advice from the cover disc helpline, including any loss of profit, damage to equipment or data, interruption of business, or any other damage, direct or accidental.*

*It is recommended that you back up any programs and data on your hard disk before installing this software. Where telephone numbers are given for registration of cover disc software, these lines may only be valid for a limited period. PC Advisor cannot be held responsible for discontinued offers. This does not affect your statutory rights.*

# cover disc: CD

Online security has to be top of your agenda, whether you're a single PC user, small business or corporate giant. So this month we've got two programs to help you keep data safe when surfing or emailing, plus a package to turn your website into a self-contained offline presentation.

Last but not least, Ritz 2002 provides an easy way to manage your finances no matter how many personal and business accounts you have to juggle.

## Internet Security Suite

Sending information over the internet – whether via email or by entering information on a website – can put your data at risk of interception and misuse. While many sites have their own secure servers to guarantee the safety of your data, Internet Security Suite is one way you can ensure privacy before personal information is even sent.

## Ritz 2002

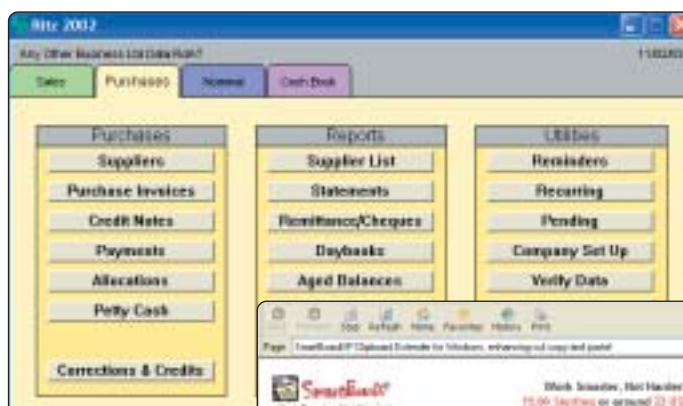

Small business users need a package that fulfils their accounting needs but doesn't make a huge dent in the finances. Ritz 2002 falls neatly in between low-cost, feature-limited software and expensive corporate-focused packages. What's more, it's completely free – simply register online to get started.

## WebCompiler 2000

Many of us have websites these days, both for business and home use. But have you ever thought how handy it would be to have those web pages accessible to present to clients or friends offline? WebCompiler can do just that, turning HTML pages into an EXE file that can be run like a mini-program on any PC.

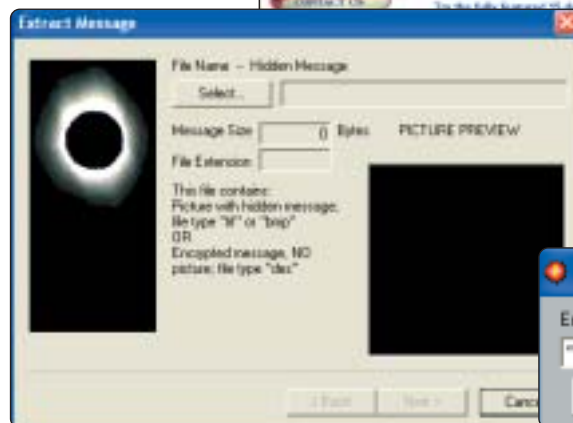

## Web-Guard

It pays to be vigilant when it comes to your PC, protecting it both online and offline. Web-Guard can track all usage of your PC, telling you what's been typed into which programs. Plus, when you're online it will shield against unwanted intruders. ■

← Ritz 2002: this flexible program is ideal for any size of business as it allows you to add on as many or as few components as you need

→ WebCompiler lets you present your website offline as a mini presentation

← Use Internet Security Suite to send sensitive data securely

↓ Web-Guard will stop users logging on to the net via your PC

# cover disc: DVD

Although the CD cover disc offers an outstanding selection of programs, the DVD packs an even bigger punch with the added diversions of the Games domain and our exclusive, full-length film. Marvel Comics Superheroes brings you a 99-minute documentary tracing the history of comicbook superheroes from 2D do-gooders to the technicolour tortured misfits of today.

Over nine separate chapters, the video describes the development of the superheroes, explaining their success and enduring popularity. Interviews with comicstrip writers, sociologists and filmmakers give you firsthand access to the methods and motivations of the industry, as well as the reasons for America's continued fascination with these magnificent mutants.

The original heroes were clean-cut, true-blue types, but fans and artists alike soon developed a taste for the darker side of superpowers.

Although the 50s saw a clamp-down on cartoon violence, this was a minor deviation from the trend towards darker, more tortured avenging angels and defenders of the world. As society in general and cartoon readers in particular became more sophisticated and blood-thirsty, so the black and white morality of the cartoons dissolved to make way for more complex and destructive role models.

↖ The mighty Thor creates some thunder

➤ Spidey's in trouble as his biggest foes join forces against him

↑ Enjoy the stunning original Marvel drawings

← The film shows our superheroes' journeys from drawing board to cartoon strip

Prime movers in this evolution were Stan Lee and the late Jack Kirby, the creative force behind Marvel Comics, which, along with its predecessor DC, dominated the industry. Among the

cartoonists interviewed in our film are a number of Marvel's artists, including Stan Lee, taking you as close to the web-slinging, tall-building-leaping superbeings as you're ever likely to get. ■
