Get the most from your images with Photo Print Gold on our first cover disc, then gorge yourself on over 60 free utilities on our second CD. Our DVD edition will also transport you back in time with a historical look at ships, planes and cars

## The easy way to load the programs

- 1 Insert the disc into your CD-ROM drive. The *PC Advisor* main menu screen should appear on your screen after a few seconds.
- 2 Click Continue at the Welcome screen. Running along the top of the next screen you will see a set of tabs, which you click on to access the various sections.
- 3 Click on the section you want to view and then select the program you want to install. You will then see an Install button; click this to load up the program.
- 4 If you experience any problems, refer to the manual instructions given or see the Read Me file. If the program still won't load visit our website or call the helpline. Please remember that *PC Advisor* can only assist with installation problems. For DVD instructions see page 183.

We're spoiling you again: there are two CDs on the front of this issue, each packed to the gunnels with full programs, trials, shareware and freeware.

On the first disc you'll find six full programs covering a variety of tasks from editing and printing your digital images and optimising Windows to planning and organising your work and ensuring all important data is safe from viruses, system crashes or accidental deletion.

Photo Print Gold provides an easy, powerful image-editing solution – you can even print your photos with captions on the back so you don't forget when and where they were taken or who's in them.

Disc two contains over 60 freeware utilities that we're sure you'll find indispensable. We've done the downloading drudgery for you and gathered together a host of Windows and internet applications to make your working life easier. You can make downloads easier, faster and safer with our download managers, speed-up programs and spyware collection, or get more from Windows' file navigation tool Explorer with a range of handy add-ons.

## DVD extras

The DVD cover disc contains all the programs from the two CDs and adds a few goodies on top. As well as the Games domain, where you'll find demos of the latest releases, we've another exclusive video. This month the theme is transport, with a retrospective look at ships, trains and cars, as well as some sea-borne jets including Buccaneers, B52s and Sea Harriers. ■

The excesses of Christmas might well be starting to fade now, but we're still overindulging you. Our two cover CDs are packed with full programs, freeware utilities and trial packages, and we also include much of the software mentioned in this month's features and workshops in the From the magazine... section.

On the first disc you'll find Photo Print Gold, a one-stop image-editing solution for importing, cropping, saving, adding effects, applying touch-ups and printing any project, whether for work or home. And once you've finished your work of art, you can use the ingenious Keepsake Notes feature which allows you to print text – from the subjects' names to quotes, dates and times – on the reverse side of any photo.

Disc two is a freeware bonanza – over 60 must-have utilities to enhance every aspect of your computing from the look of your desktop and the speed of your hardware to the performance of Windows Explorer and the internet.

There are privacy and security packages to make downloads secure and surfing safer as well as compression utilities for making files smaller for storing or emailing. And if you're the paranoid sort (or even just tidy-minded), you'll love the file deletion applications we've included. Make sure that sensitive data is properly wiped from your hard drive with one of the five programs in this section.

We didn't have the space to list all 60 packages on the right, so check out the back of the CD wallet for a full rundown. ■

We've taken footage from three videos, The Story of Ships, The Story of Trains and The Story of Motoring, to bring you almost one hour of captivating film looking at transport through the ages.

## Exclusive video: Ships, trains & automobiles

The 20th century has seen massive leaps in technology, and perhaps the biggest of these changes have been in the field of travel. Our DVD covers the development of battleships, cars and trains through two world wars.

- Battleships! Ships played a pivotal role in wars throughout the last century. This chapter opens with operation Pedestal – the relief of the island of Malta in June 1942 – and the effect this had on the North Africa campaign.
- Days of Steam David Shepherd introduces his passion: a 140-tonne Black Prince steam engine. There are interviews with Keith Stuart of Bluebell Railways and footage of heritage and mainline working steam engines.
- Model T Ford Watch interviews with Lord Montague of Beaulieu and Michael Ware, director of the National Motor Museum, about the influence of the motor car on 20th century western culture. Ford's introduction of mass-production on the scale we see today proved especially important. ■

←↶↷ Changing gear, going places: the transport revolution was as profound in the first half of the 20th century as the digital revolution was in the second half
