This month's cover disc will push your test-taking skills to the max, let you send text messages from your PC and design your very own web menus. The DVD edition brings you all this plus four extra full programs including a copy of the Linux operating system

cover disc: CD

This month's cover disc is a smorgasbord of software packages to make your PC (and mind) run smoother, faster and more effectively.

The Times Testing Series

The Times Psychometric Test will push your logic and reasoning skills to the max. Find out why more and more companies are using them when screening for employees and what you can do to improve your chances of securing that dream job.

→ Discover your full potential with The Times Psychometric Tests. There are three categories to complete at your leisure or, if you're bold enough, against the clock

WinShark crm Lite

Keep track of client meetings and conversations with this customer relationship software. It can hold details of up to 50 firms in one centralised database.

SMS Press

Send messages from your PC to any mobile phone with SMS Press. There are 30 free credits to get you started.

1 Cool Menu FX Tool Lite

Designing your own web menus couldn't be simpler. Cool Menu provides predefined templates but every aspect can be customised. And what's more, it converts your instructions into HTML code.

DriverWizard

DriverWizard is an ingenious little program that ensures your hardware devices are running optimally, telling you when new drivers become available. ■

Cover disc liability

The CD-ROM and DVD on the cover of PC Advisor are supplied as is, subject to the following terms and conditions. The CD-ROM and DVD are provided as free items to readers of PC Advisor for their personal use, and may not be resold or copied for distribution. The publisher shall have no liability without limitation for any losses or damage arising from using these software programs or taking advice from the cover disc helpline, including any loss of profit, damage to equipment or data, interruption of business, or any other damage, direct or accidental.

It is recommended that you back up any programs and data on your hard disk before installing this software. Where telephone numbers are given for registration of cover disc software, these lines may only be valid for a limited period. PC Advisor cannot be held responsible for discontinued offers. This does not affect your statutory rights.

cover disc: DVD

The star of October's DVD promises to bring Hollywood production values to your home movies. Armed with PowerProducer and a DVD writer, you can take almost any video file and burn it to a DVD disc suitable for playback in a standard DVD player.

If PowerProducer's extensive video capture facilities aren't enough for you, try ADS Technologies' CameraView. And should you think your finished movie is right up there with *Citizen Kane*, why not use Astrosell to share it with the world?

If you're tempted by the idea of swapping Microsoft Windows for the increasingly popular Linux operating system, you won't find an easier introduction than this month's Mandrake Linux 9.1. This renowned Linux implementation offers an attractive user interface and a clutch of top Linux applications.

Last but not least, we've included our usual batch of high-quality games demos. Whether you want to battle with aliens, race cars or the Incredible Hulk, visit our Games domain section to experience a taste of the ultimate in heart-stopping arcade action. ■

← Our Games domain is packed with great demos for you to try, from shoot-'em-ups to strategy

↑ Make your own movies with PowerProducer

← Astrosell makes it easy to set up your own online store

How to load the programs on the CD and DVD

1 Insert the disc into your CD-ROM or DVD-ROM drive. The *PC Advisor* main menu screen should appear after a few seconds. If not, type d:\master.exe (where D is the letter of your CD or DVD drive).

2 Click Continue at the Welcome screen. Running along the top of the next screen you will see a set of tabs; you need to click on one of these to access the software in that section.

3 Once you have clicked on the tab relating to the section you want to view – say Internet toolbox, for instance – next select, from the lefthand list, the program that you want to install. You will then see that package's details on the righthand side of the screen and a blue Install button; click this to load up the program. Click View to download a program from the relevant website.

4 If you experience any problems, refer to the manual instructions on pages 175-180 or see the related Read Me file. Alternatively, use Windows Explorer to find the program executable you require and double-click to launch it. If the program still won't load visit our website or call the helpline. Please remember that *PC Advisor* can only assist with installation difficulties.

DVD extras

Readers with the DVD edition of the magazine can enjoy all the content from our CD edition (listed opposite) as well as the following great extras...
