Whatever files you want to store, DiscJuggler is ideal for your backup needs, helping you secure information safely offsite. Meanwhile discover the art of speech-recognition with IBM's ViaVoice pack, turning your conversation into accurate text onscreen

## DiscJuggler 3.5

## EXCLUSIVE FULL PROGRAM

We never tire of reminding you how important it is to back up your data and system files (see *Back up and survive* on page 114). So we thought it best to provide you with some software that could help you in your efforts to copy and secure information safely offsite.

With DiscJuggler from Padus, you get access to professional-quality compact disc duplication software with an extensive set of features. The package has a straightforward and streamlined user interface, making it easy to use.

The CD copying facilities provided by DiscJuggler ensure duplicating CDs is fast and reliable. Making a copy of an existing family photo album to send to relatives, or mass-producing a CD of essential files for employees at your company is just a few clicks away.

This package is ideal for all your disc backup and duplication needs. Whatever files you want to store on disc, all you need is a CD writer, some recordable CDs and DiscJuggler.

### Respect copyrights

DiscJuggler allows you the ability to copy various forms of media. It is against the law to make or distribute reproductions of copyrighted material. We at *PC Advisor* respect the rights of artists and we ask that you do the same. ■

**1** After you have installed DiscJuggler, go online to [www.blitzbox.biz/discjuggler](http://www.blitzbox.biz/discjuggler) to register it. Then start up the program and put the discs you want to copy into your CD drive or drives. Open up DiscJuggler and select New from the File menu

**2** A number of options will appear. For the easiest way to duplicate a CD, select the fourth option 'CD Player to CD Recorder'. This option requires that you have the original CD in the player drive and a blank CD-R in the recorder drive. Clicking any of the options will reveal a description of that choice below the Type window

## IBM ViaVoice Millennium Standard 7.0

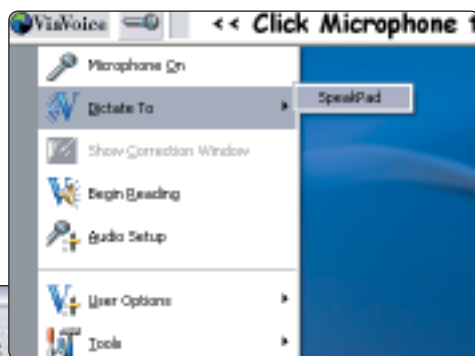

## FULL PROGRAM

Being able to speak to your PC and have it turn your words into accurate text has long been the dream of non-typists.

Speech-recognition software lets you do just that and, with over 30 years of experience in this sector, IBM certainly knows a thing or two about turning talk into text.

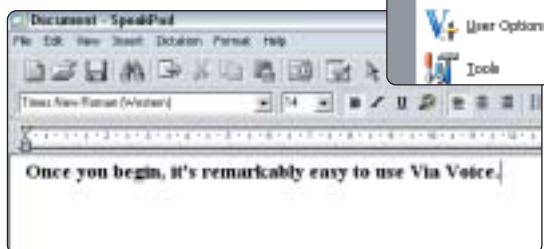

This month we have included a full copy of IBM's ViaVoice Millennium Standard 7.0 on our

cover disc, so you can try it out for yourself. To use the package you will need a good quality headset with a microphone to allow you to speak into your computer.

↑ The ViaVoice interface is accessed from a bar at the top of your screen

← The more you train ViaVoice, the better it will recognise your voice

Once you have set up the hardware and software, prepare yourself to train the software for a while and bear in mind the more time you spend training the more accurate it will be. ■

## UFO Diaries: Close Encounters **EXCLUSIVE VIDEO**

The final instalment of our exclusive series takes a look at the mysteries of UFOs and aliens, with accounts from people who claim to have seen strange things in the night skies...

**W**hether you believe in aliens or not, our DVD video will make you think twice. The spine-chilling stories told by eyewitnesses are extremely compelling and seem to add credibility to the idea of alien abductions and UFO sightings.

- What are they like?

This chapter looks at the famous sighting of an alien craft back in 1947 when pilot Kenneth Arnold reported spotting an object not known to this world. Shortly after in the summer of that year an 'alien' object crashed in New Mexico with eye witnesses testifying that the remains and bodies were not from this planet.

All debris was collected by the American military and quickly swept away. Is there a government conspiracy by the US to stop us knowing the truth about aliens? Watch and decide.

- Abductions Observe the story of Betty and Barney Hills who claim they were abducted back in the 1940s. Strong evidence indicates their story is true. However their claims were given little credibility outside the world of UFO research until similar accounts were reported 10 years later by Mr Hickson and Parker, who alleged to have been abducted whilst on a fishing trip.

The accounts of their ordeal were so similar to the Hills' that their stories gained worldwide attention.

- True or False? Every year the American government is inundated with hoax UFO sightings and reports of alien activities. Orson Welles' radio adaptation of HG Wells' *War of the Worlds* in 1938 shocked thousands of Americans, who believed the dramatic news bulletin was real.

← Signs of life or just a hoax? Our fascinating video helps you decide

↑ Extraterrestrial activities: seeing is believing

→ Some say that there are secrets that the US Government will kill to protect

### To install:

To watch the video, load your desktop DVD player and press Play to bring up the chapter menu. To load the *PC Advisor* software interface, follow these instructions.

Go to Start, Run. Then type d:\master.exe (where D is the letter of your DVD drive). Or go to Start, Programs, Windows Explorer to locate the relevant EXE file. Follow the onscreen instructions to install the program you want. Please read the licence and any Read Me files for any special instructions that may relate to the individual products.

If you are unable to access the DVD contents or experience problems with the disc, call our DVD helpline on 0870 739 7630.

Hundreds of hoax sightings and abductions are recorded each year. The section goes on to look at how researchers determine the credibility of claims and discuss the evidence put forward by alleged victims.

### Minority Report trailer

We've also got our hands on the trailer for the Minority Report game which is based on Steven Spielberg's sci-fi blockbuster hit and lets you relive the movie experience from the comfort of your own armchair.

You are a crime investigator (Tom Cruise's character in the film) based in Washington DC. The year is 2054 and it's your job to catch murderers before they commit their evil crimes. Police utilise special technology to see into the future and stop crime before it happens. But now you are on the receiving end, convicted of murdering a man you haven't even met.

It is up to you to stay out of the hands of the law and prove the system isn't infallible. Protect your innocence and run for your life. ■
