- 164 Full DVD information

Topping the bill this issue is Alpha Five 4.5, a database that's so easy to use you'll be cataloguing your CD collection in no time. Plus add turbopower where it's needed most with PC Booster and design a website to be proud of with Xara Webstyle

## The easy way to load the programs

- 1 Insert the disc into your CD-ROM drive. The *PC Advisor* main menu screen should appear on your screen after a few seconds.
- 2 Click Continue at the Welcome screen. Running along the top of the next screen you will see a set of tabs, which you click on to access the various sections.
- 3 Click on the section you want to view and then select the program you want to install. You will then see an Install button; click this to load up the program.
- 4 If you experience any problems, refer to the manual instructions given or see the Read Me file. If the program still won't load visit our website or call the helpline. Please remember that *PC Advisor* can only assist with installation problems. For DVD instructions see page 164.

## Problems with the cover disc?

Visit [www.pcadvisor.co.uk](http://www.pcadvisor.co.uk)  
or call 0870 739 7630

If you've missed any of our DVDs, order them for £2.99 each inc p&p. Call 01795 414 939 to order using your credit card.

(UK only, subject to availability)

**D**atabase is a word which strikes fear into many, but load up Alpha Five and you'll soon be wondering why you ever worried. This powerful, easy-to-use package will have you producing all manner of work- and leisure-related databases, reports and invoices in minutes. You can even create letters and mailing labels.

You'll need to register your copy of Alpha Five 4.5 and 250 of those who do so will receive version 5.0 absolutely free.

If you want to get a website up and running quickly our next full program has all you need to get you started. Xara Webstyle 2.0 has a huge variety of templates for those with little time or inspiration, or you can create your own from scratch.

The software also has libraries of essential elements such as buttons, logos, menus, photos and backgrounds which will give your pages a professional, cohesive look. With its simple interface and helpful walkthroughs, Webstyle makes web design child's play.

If you're worried your office PCs are sapping energy unnecessarily, take a look at EnergyScout. And if you're hungry for more power, load up PC Booster. Finally, don't forget to try our selection of recommended trial, demo and shareware applications.

## DVD extras

Readers with the DVD edition of the magazine can enjoy all of the above as well as our games domain demos and exclusive video, *Incredible Inventions*, brought to you in association with newsreel archive supremo British Pathe. ■

## Cover disc liability

The CD-ROM and DVD on the cover of *PC Advisor* are supplied as is, subject to the following terms and conditions. The CD-ROM and DVD are provided as free items to readers of *PC Advisor* for their personal use, and may not be resold or copied for distribution. The publisher shall have no liability without limitation for any losses or damage arising from using these software programs or taking advice from the cover disc helpline, including any loss of profit, damage to equipment or data, interruption of business, or any other damage, direct or accidental.

It is recommended that you back up any programs and data on your hard disk before installing this software. Where telephone numbers are given for registration of cover disc software, these lines may only be valid for a limited period. *PC Advisor* cannot be held responsible for discontinued offers. This does not affect your statutory rights.

# cover disc: CD

**B**etter productivity is the keyword for the great line-up of giveaways we have on this month's cover disc. Thanks to our four full programs, you're a few mouse clicks away from becoming a high-output operative while expending less energy on getting the task done.

## Alpha Five 4.5

Improve your IT performance at home and work thanks to the powerful database package Alpha Five 4.5. If you thought FileMaker and Microsoft's Access were the be-all and end-all of database applications and development tools then think again. Try the hugely versatile Alpha Five 4.5 and it won't be long before you're scripting away using menu-driven coding.

## Xara Webstyle 2.0

For those of you not sure how to improve your web pages we have Xara Webstyle. This complete web design package was designed specifically for users with little knowledge of producing websites. It sports easy-to-use icon-driven menus that will have you arranging great web pages in no time at all.

## PC Booster 1.0

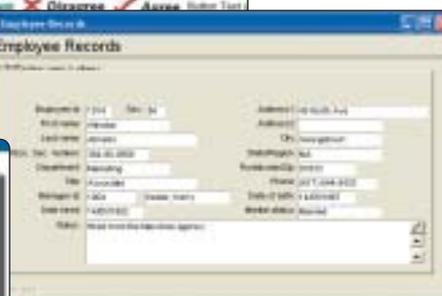

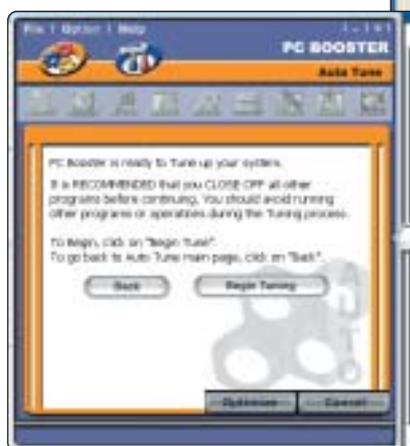

Looking for the simplest way to optimise your PC's performance? Try PC Booster. This handy tool troubleshoots problematic hardware so that, nine times out of 10, you won't have to pay out for expensive component upgrades. Best of all, it only takes a couple of clicks to get the job done. This option might not be enough for those of you who like to get their hands dirty. Don't worry, though, as PC Booster has a manual mode so you can tweak configurations yourself.

## EnergyScout 1.0

If you are getting concerned about the ever-mounting costs of running your office then we've got a utility that can help slash costs. EnergyScout is a Windows 2000 and XP tool which discreetly monitors each workstation and provides a report showing how often they are used.

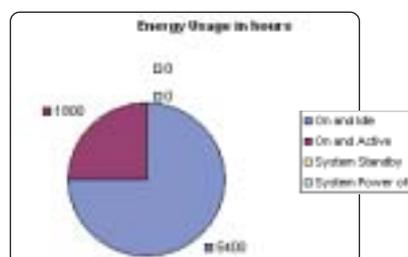

← Xara Webstyle has libraries chock-full of buttons, effects, templates and more to give your website the edge

↑ Databases made easy, courtesy of Alpha Five 4.5

← Give your system a tune-up with PC Booster

↓ Idle PCs use power too. See how many of them are adding to your office electricity bill

Those PCs that aren't being accessed or are idling for a long time can then be switched off or powered down into hibernate mode to save you cash as well as helping the environment by reducing energy waste. ■

# cover disc: DVD

↶ ↷ ↴ Clockwise from top left: the sonic washing machine; glass car on the road... and in the shop; the first TV telephone in use

We've delved into Pathe's newsreel archives to bring you a DVD packed with 40 minutes of film looking at technological innovations from the fascinating to the funny. The footage is split into three sections and some of the earlier clips are silent.

- **Communications** From the early days of telephones and televisions, and the first attempts at making them a convergence device, this chapter gives you an idea just how comparatively basic communications were around 50 years ago. You'll never take your mobile phone for granted again.
- **Inventions** The Inventions chapter is a treat, with some side-splittingly funny ideas that never made it into mass production. The hilarious buffer belt is designed to "keep your partner at bay", while the humming washing machine sings as it cleans. The fuel-guzzling, and somewhat unstable, one-man jetpack is a must-see. Finally, don't miss the glass car – a 50mph vehicle that must be a nightmare to keep free of streaky handprints.
- **Crazy computers** The digital PDP computer composes and plays music – of sorts. Beethoven it certainly isn't, but in its day this computer was groundbreaking. Railways also get a look-in in this chapter. Find out how trains progressed from steam to electricity, thanks to a few rather clever computers. ■
