There's something for everyone on this month's disc, whether you want to create your very own masterpiece, enhance your web surfing or convert your home DVD movies into a format you can burn on to CDs. And on the DVD we've extra full programs and games

cover disc: CD

From digital video conversion to digital image creation, we've got all bases covered. And don't forget our selection of utilities mentioned in this issue's articles and Helpline. That lot should keep you busy at least until the next issue of *PC Advisor* hits the shelves.

DVD Magic and Global Divx Player

Sharing home movies you've burned to DVD is tricky if friends have an aged computer with no DVD player. DVD Magic lets you convert your footage into CD-compatible format, while Global Divx Player is great for playback as it uses minimal system resources.

Dogwaffle 1.15

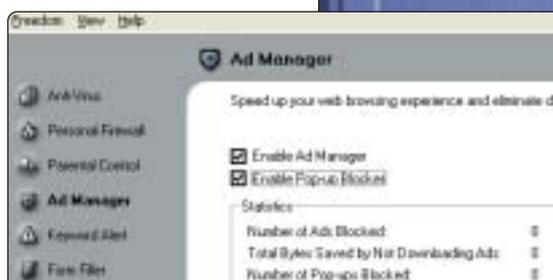

A brilliant application for creating your very own works of art, Dogwaffle 1.15 will provide plenty of challenges for the more experienced user while being intuitive enough for beginners. There are loads of tools, brushes and filters to help you discover your artistic side.

SafeWorld Internet Security Special Edition

Containing features such as a pop-up blocker and a cookie manager, SafeWorld will guard your privacy on the internet, as well as putting a stop to those tiresome tricks that advertisers use to push their products. There are also trial versions of antivirus and firewall software. ■

→ Turn DVDs into CD-Rs with DVD Magic

Cover disc liability

The CD-ROM and DVD on the cover of PC Advisor are supplied as is, subject to the following terms and conditions. The CD-ROM and DVD are provided as free items to readers of PC Advisor for their personal use, and may not be resold or copied for distribution. The publisher shall have no liability without limitation for any losses or damage arising from using these software programs or taking advice from the cover disc helpline, including any loss of profit, damage to equipment or data, interruption of business, or any other damage, direct or accidental.

It is recommended that you back up any programs and data on your hard disk before installing this software. Where telephone numbers are given for registration of cover disc software, these lines may only be valid for a limited period. PC Advisor cannot be held responsible for discontinued offers. This does not affect your statutory rights.

PC Advisor 2003 © IDG Communications

cover disc: DVD

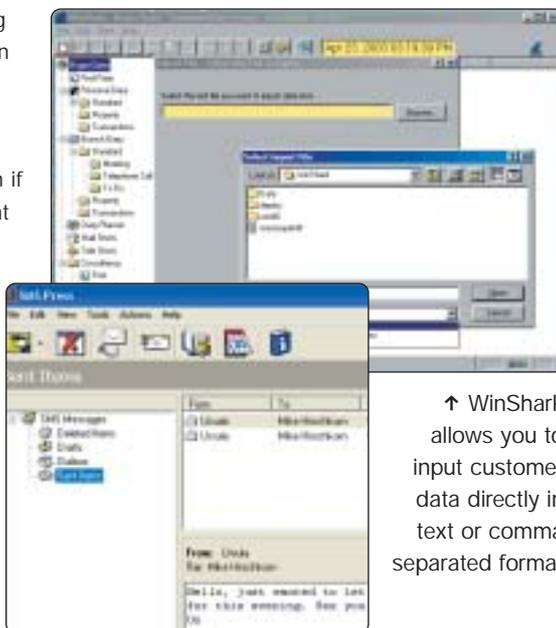

We have three cracking software packages on our DVD this month, two of which are exclusive to *PC Advisor* readers.

If you are text mad, or even if you'd like to be but find all that fiddling round with buttons on your mobile a bit of a pain, then SMSPress is ideal for you. This simple package provides an easy way to send text messages direct from your PC. It comes with 30 free credits, so you can get texting as soon as you've registered the software. It also has handy features to send out mass text messages and store all your contacts.

For our many business readers we have an ideal tool to help you keep track of your client contacts in the shape of WinShark crm Lite. This customer relationship management software helps you to store and monitor all your company contacts. You can track all your interaction with clients to make sure you never miss a trick and store all your contact information in a single, centralised database.

Another way to keep in touch with friends and clients is to develop a compelling website, and one way to do this is to ensure your menus are top notch and easy to follow. That's where AllWebMenus comes in, allowing you to create professional looking menus with no need to learn a thing about coding. ■

↑ WinShark allows you to input customer data directly in text or comma separated format

↙ SMSPress keeps track of all the text messages you have sent

How to load the programs on the CD and DVD

1 Insert the disc into your CD-ROM or DVD-ROM drive. The *PC Advisor* main menu screen should appear after a few seconds. If not, type d:\master.exe (where D is the letter of your CD or DVD drive).

2 Click Continue at the Welcome screen. Running along the top of the next screen you will see a set of tabs; you need to click on one of these to access the software in that section.

3 Once you have clicked on the tab relating to the section you want to view – say Internet toolbox, for instance – next select, from the lefthand list, the program that you want to install. You will then see that package's details on the righthand side of the screen and a blue Install button; click this to load up the program. Click View to download a program from the relevant website.

4 If you experience any problems, refer to the manual instructions on pages 168-179 or see the related Read Me file. Alternatively, use Windows Explorer to find the program executable you require and double-click to launch it. If the program still won't load visit our website or call the helpline. Please remember that *PC Advisor* can only assist with installation difficulties.

DVD extras

Readers with the DVD edition of the magazine can enjoy all the content from our CD edition (listed opposite) as well as the following great extras...
