Convert your DVD movies to CD-R format, free your artistic talents and deflect internet nasties. Readers with the DVD edition can also enjoy PC-to-mobile text messages, better customer database management and the ability to add va-va-voom to their website menus

DVD Magic

EXCLUSIVE FULL PROGRAM

Many digital camcorder owners will have hard drives full of footage and in recent years it has made sense for them to store their videos on DVD discs rather than CDs. This is because DVD writers have become more common and a good deal cheaper, while the discs themselves can store about eight times more than a CD.

So rather than sticking on a VHS tape of the kids in the paddling pool, we're now watching home movies on DVD.

But not everyone has a DVD player or a PC with a DVD-ROM drive. If you've got some home videos on DVDs that you want to send out to relatives or friends then you can convert them into formats that can be stored and played on CD-R and CD-RW discs with DVD Magic. The quality of the finished CD might not be as perfect as the DVD video but it's still very good.

It's a simple process. All you will need is a DVD-ROM drive and a CD rewriter – even a CD-RW/DVD combo drive will do. DVD Magic helps you to compress the video that is on the DVD, copy it into a temp folder on your hard drive and then burn it on to a CD. You can choose from three formats including VideoCD and SuperVideoCD, allowing you to distribute your home movies quickly and easily with no compatibility issues. ■

1 Once you've installed DVD Magic you're ready to insert the DVD video you want to copy to CD. Right-click on the main pane in the DVD Magic window to choose the source drive, which should be your DVD-ROM drive

2 Once the DVD has been inserted click on the Next button at the bottom of the DVD Magic window

3 Next, choose the format you want to convert the video into. The choices are Divx, VideoCD or SuperVideoCD format. If the DVD video you are converting had subtitles you can choose whether or not to transfer them on to the CD. Click Next

To install: 95 98 Me 2000 NT XP

DVD Magic

The software should autorun when you click Install on the CD menu. If not, go to Start, Run. Type D:\setup.exe (where D is the letter of your CD-ROM drive).

System requirements

500MHz Pentium PC; Windows 95/98/Me/NT 4.0/2000/XP; 32MB RAM; 4GB hard disk space; DVD drive or player; CD-R drive

To install: 95 98 Me 2000 NT XP

Global Divx Player 1.9.9.5

The software should autorun when you click the Install button on the CD menu. If not, go to Start, Run. Type D:\gdivx\gdivx1995.exe (where D is the letter of your CD-ROM drive).

System requirements

Pentium PC; Windows 95/98/Me/NT/2000/XP; 16MB RAM; 5MB hard disk space

Global Divx Player 1.9.9.5

FULL PROGRAM

Digital video is a memory-intensive application and even the latest PCs can slow under the strain of playback. That's why we have included the Global Divx Player on this month's cover disc. It will help out your PC when it comes to playing back those CDs you've burned with DVD Magic.

Many programs similar to Global Divx Player – for example, Windows Media Player – use up quite a lot of resources when they're running, sapping the power from a PC's memory and putting a strain on the processor. Global Divx Player is a much simpler and therefore more efficient media player. Even those of you who use

older PCs should find that Global Divx Player will run smoothly on your system. You'll be able to play back WMV (Windows Media Video), Mpegs and AVI (audio video interleaved) files with Global Divx Player 1.9.9.5. And that list covers pretty much all of your multimedia playback needs. ■

Respect copyrights
DVD Magic lets you duplicate a variety of formats of DVD disc to CD-R. However, we would stress that it is against the law to make or distribute reproductions of copyrighted material. We at *PC Advisor* respect the copyrights of artists and ask that you do the same.

4 Choose the type of the target CD according to its storage capacity. DVD Magic will automatically break the video into disc size chunks, but if you're using a 700MB CD then you will need to select the Split at 80min option. You can also opt to see a preview of what you're converting and whether to delete the temporary video files after the process has been completed. Click Next

5 Before starting the process click on the Extra Options button. If there is more than one chunk of video on the DVD, select the segment you want in the Program Chain drop-down window. Choose a temporary directory for the video files to be transferred to. You can also change the audio options in this window. Click Prev

6 Click on Start to begin the process. If at any time you wish to halt the process, simply select Abort

7 Once the compression has completed you will be asked to insert a blank CD into your CD-RW drive

8 Once the CD has been written you can play back the video using either Windows Media Player or Global Divx 1.9.9.5, which we have included on the cover disc

Subscribe to *PC Advisor* for only £11.99

Take out a six-month subscription to *PC Advisor* for £11.99 and you'll not only ensure that you never miss a single issue or cover disc, you'll also receive a FREE gift. Simply fill in this coupon, tick your choice of software below and return it to us.

Subscriber Collection CD
A comprehensive collection of office materials. From the office suite OpenOffice.org 1.1 and the ThumbsPlus 3.33 image-editing suite to the great Times Brain Teasers Volume 1.

2000-2002 Issue Archive CD
No more rifling through your back issues to find an article, phone number or price – with this CD you can access all the information you want in seconds. It's a fully searchable magazine archive, covering 36 issues.

Desktop Companion CD
Three full programs to get you publishing on the web and in print. Amazing 3D Font Maker transforms ordinary fonts with dazzling 3D effects, 100,000 images should provide enough inspiration for any project, and Desktop Publisher will help with the design.

competition terms and conditions
(see page 12 for details).

The prize

AOpen's DVD-1240 is a 12-speed DVD-ROM drive and 40-speed CD drive with a 512KB memory buffer. It will read DVD and CD formats, including writable and rewritable discs, and its tray loading mechanism supports vertical or horizontal mounting in a PC.

The drive features CAV technology to keep discs on track, while the dynamic damping system soaks up vibration to minimise errors and to improve the stability of disc reading.

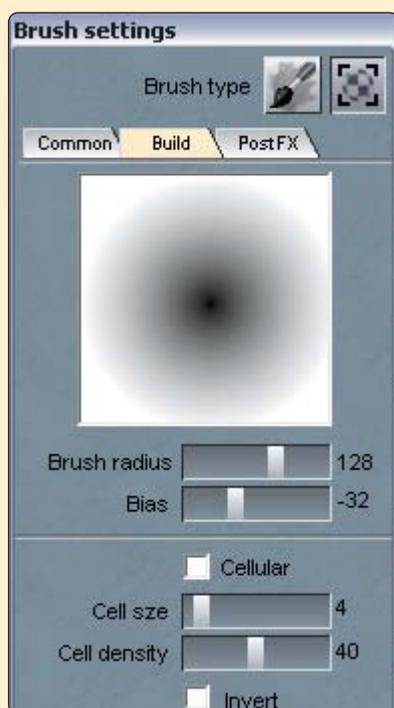

This drive is the perfect start for those about to enter the world of DVD, allowing you to watch films on your PC.

Dogwaffle 1.15

FULL PROGRAM

→↓ Dogwaffle provides a set of brushes but the program also allows you to customise them to your exact needs

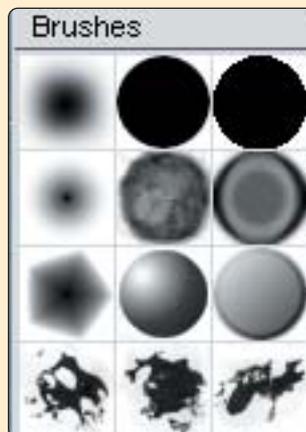

➤ Extensive menu options provide power and flexibility

→ A comprehensive range of tools is on hand to help with any project

↑ Don't like the shades on offer? Dogwaffle lets you mix your own

If you don't want to just play around with images you've already got but actually create some artwork from scratch then Dogwaffle 1.15 is the program for you. Similarly, if you fancy yourself as a bit of an artist but don't want to make a big mess with pots of paint then this full program is ideal. Even if your experience of painting is limited to the skirting boards in the spare bedroom you can still load up Dogwaffle and get creative.

Every Microsoft operating system contains an accessory called Paint and if you've ever used that then you'll be familiar with the basics of Dogwaffle 1.15. It's not too difficult to use but perseverance will pay off. You'll also benefit from experimenting with the many different tools and functions available.

Though you'll find a number of different preset brushes in Dogwaffle 1.15, you can also create your own custom brushes. There's a default range of colours and some preset colour schemes that you can use but, again, you can create your own shades to suit your needs. You can mix colours with the palette mixer to get the precise tone you want.

The plethora of filters add a multitude of effects to your work. And don't worry if you make a mistake as it's really easy to undo errors and start afresh.

With Dogwaffle you'll be creating really professional artwork in no time at all. And it'll keep you entertained for hours, whether you take your art seriously or see it more as a fun hobby.

To install: 95 98 Me 2000 NT XP

Dogwaffle 1.15

The software should autorun when you click Install on the CD menu. If not, go to Start, Run. Where D is the letter of your CD-ROM drive, type D:\dogwaffle\readme_installation.txt (files need to be copied to your PC prior to unzip and installation).

System requirements

Pentium PC; Windows 95/98/NT/Me/2000/XP; 16MB RAM; 30MB hard disk space

SafeWorld Internet Security Suite SE

FULL PROGRAM

There's no denying that the world wide web is a great research tool and a good way to while away the hours, but there's a lot that we can't control about it.

The pop-up ads, viruses and obscene content that you and your children can be exposed to is always a concern. By using SafeWorld Internet Security Special Edition you can put your mind at rest. This program is all you will need to stop and control the annoyances we have come to associate with surfing the internet.

To use SafeWorld you will have to register online during the installation process. Please note that the AntiVirus, Firewall and Parental Control applications are 60-day free trials. Everything else is fully working software available for unlimited use.

Ad Manager and Pop-up Blocker

This application allows you to speed up the process of browsing on the internet by blocking pop-up advertisements. You can also choose whether or not to view the advertising displayed on a certain website. These can be filtered out without altering the site's appearance.

Keyword Alert

This safeguard scans all your outgoing communications such as email for what might be potentially sensitive information. It warns you before the data is sent so you have a chance to stop personal information falling into the wrong hands.

To install:

98 Me 2000 XP

SafeWorld Internet Security Suite Special Edition

The software should autorun when you click Install on the CD menu. If not, go to Start, Run. Type D:\safeworld\install.exe (where D is the letter of your CD-ROM drive).

System requirements

233MHz Pentium PC; Windows 98 SE/Me/2000/XP; 64MB RAM; 45MB hard disk space; internet connection; Internet Explorer 5.01 SP2 or higher

Form Filler

Let Form Filler automatically complete online registrations and purchase orders for you. To prevent your security from being compromised, sensitive information is encrypted before being stored on your PC.

Cookie Manager

Websites that you visit record information about your browsing habits but with the Cookie Manager you can have control over how much personal data the sites are able to collect.

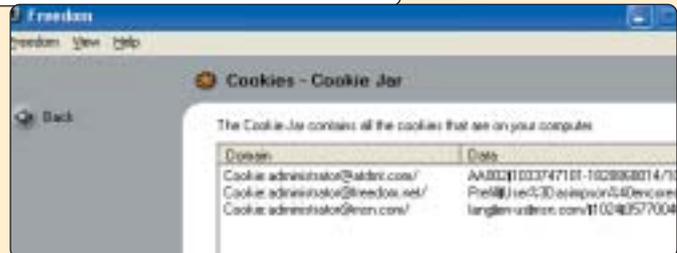

Additional 60-day trials

- SafeWorld Anti-Virus You can protect yourself from viruses and Trojan horses with SafeWorld's Anti-Virus software.
- SafeWorld Firewall Get instant alerts when any unauthorised attempt is made to connect to your PC.
- SafeWorld Parental Control Protect your child from obscene and inappropriate content with the Parental Controls. It's also possible to schedule set hours that your son/daughter will be allowed access to the internet. ■

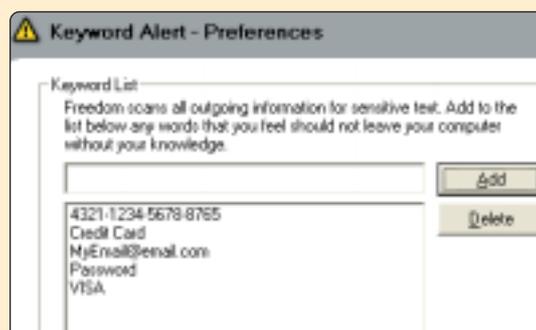

← You decide how to manage pop-ups...

↓ ...and those pesky cookies

← If you like to shop online, simply enter credit card details into Freedom's Form Filler to streamline the buying process

← If you're worried about your credit card details or any other personal data being accessed on your computer, add them to the Keyword Alert list

Buy PC Advisor DVDs

If you've missed any of our fabulous cover DVDs you can buy the discs separately for £2.99 each, including post and packing.

Perhaps you want to complete a set of films, such as our four-part popular UFO Diaries

series, or perhaps you'd like to get hold of *From Prussia with Love*, the episode of *Only Fools and Horses* which was covermounted with the January 03 DVD issue.

To order these or any of our DVDs log on to the website address given below or call 01795 414 836 (limited stock on some DVDs).

Call *PC Advisor* on 01795 414 836
or visit www.pcadvisor.co.uk/dvd

PC Advisor Issue Archive CD

The PC Advisor 2000-2002 Issue Archive CD is just £9.99 including post and packaging. If you've ever missed an issue of the magazine or can't find an article you know you've seen, this fully interactive CD, which contains 36 issues in

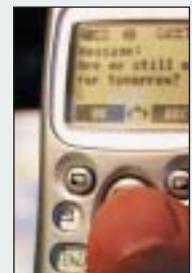

searchable and printable PDF (portable document format) for under £10, will prove indispensable.

To order your copy of this reference disc, telephone 01795 414 836 with your credit card details and quote BACK3. Alternatively, if you are thinking of subscribing to *PC Advisor* or want to renew your subscription, you could get this CD free. Simply call the same number for more details.

Call *PC Advisor* on 01795 414 836 or
visit www.pcadvisor.co.uk/issuearchive

SMSPress

Send text messages directly from your PC in half the time and at a fraction of the amount it costs to send them from your mobile phone. Each message can be personalised and you can also set the Sender ID so that those receiving your text know exactly who it's from. Responses can be sent directly to your mobile phone or scheduled for delivery up to seven days in advance.

If you're a text junkie, SMSPress will reduce wear and tear on your thumbs and save you a packet!

• Upgrade offer Get the full version of SMSPress for just £49.99. Plus, purchase 200 additional credits for the bargain price of £12.

Visit www.dynmark.com or call Dynmark International on 0870 240 3579

All offers subject to availability. Please allow 28 days for delivery

DVD SMSPress 2.0

EXCLUSIVE FULL PROGRAM

Sending text messages has never been more popular. Every year millions of messages are tapped out on mobile keypads and sent to another phone, helping people to keep in touch and stay informed.

But we find that actually composing a literate message on a phone keypad is nigh-on impossible. Pressing away on fiddly buttons slows our inept fingers right down and more often than not our messages are littered with mistakes and bizarre abbreviations.

One clever way round this problem is to use the SMSPress 2.0 software bundled on this month's DVD. The package allows you to compose and send messages to mobile phones from your PC. It adds a whole host of advanced features so you can schedule when to send messages and decide who to send them to.

There's also the benefit of using a full-size keyboard to write your texts and the speed of your internet connection to whiz them off to the recipients.

To make sending texts to all your friends or business contacts easy, you can build up a database of contacts then simply click on those you want to send your message to and their mobile number will be entered in the To box.

The MessageShot Wizard is designed to make mass-messaging easier, allowing you to quickly create groups to whom you want to send the same message. There are also a host of bundled templates that cover things like booking confirmations or reminders.

Register online

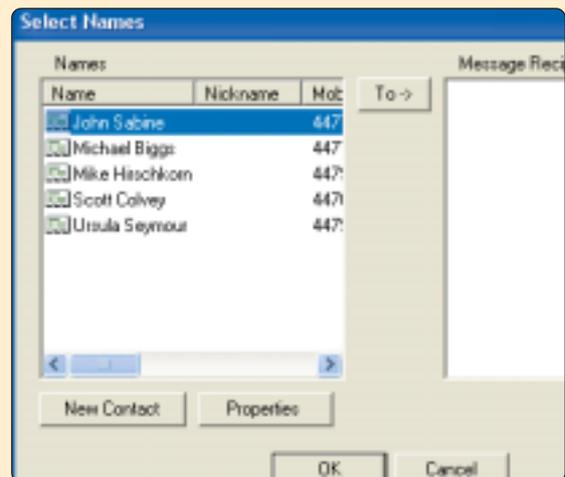

Before you can use SMSPress you must register your details at www.dynmark.com. Once you have registered you will be sent an activation code. Simply type this number in to finish installation.

Your account will be credited with 30 free messages – after that you will have to pay for any more that you want to send. The current message prices can be found on the website and are generally no more than a few pence. It's best to buy messages in bulk as the more credits you buy, the less they cost. ■

1 Go to File, select New and choose SMS Message. Alternatively press Ctrl, N to pull up an empty message window

2 Highlight the name of the person you want to text and click on the To arrow to put their number in the righthand box. Add other recipients in the same way. When you are finished click ok and all names will appear in the To box on your message

3 Type your message into the text box then go to File and select Send. You will be taken to the Outbox where you can review your message. To send the message press the Send button, which is fourth from the left on the button bar and features an envelope icon

To install:

98 Me 2000 XP

SMSPress 2.0 (inc 30 free credits)
The software should autorun when you click Install on the DVD menu. If not, go to Start, Run. Type E:\smspress\setup.exe (where E is the letter of your DVD-ROM drive).

System requirements
90MHz Pentium processor; Windows 98/Me/2000/XP; 64MB RAM; 50MB hard disk space; modem

DVD WinShark crm Lite

EXCLUSIVE FULL PROGRAM

Effective contact management is one of the keys to a successful business, which is why CRM (customer relationship management) software is so invaluable. With a CRM package such as WinShark it's easier to keep track of all your clients.

As well as providing a centralised place for storing contacts' email, postal and telephone details, WinShark crm also records your interaction with customers. It logs all activity, from the first sales call to payment of the final invoices, so you always know what's what.

Because WinShark crm helps you keep on top of all your wheelings and dealings, it leaves you the time to concentrate on building up your business. The Lite version on the DVD is ideal for smaller firms as it

can hold details on up to 50 companies or individual customers.

Before you start using WinShark crm you will be asked to complete a questionnaire so that the software can be tailored to your business' specific needs. Once you reboot the package you will be presented with an Explorer-like interface and a task tree down the lefthand side. Now you have the option to directly import customer data either as plain text or in CSV (comma separated) format.

WinShark can tell you when you last spoke or met with a client and whether it was on the telephone, at a meeting or by letter. This should help you keep leads hot and make sure key customers don't end up feeling neglected. An ideal way to keep in touch with your customers and keep

your business at the front of their minds is to design a mailshot. WinShark crm provides you with all the tools you need to create mailouts in Microsoft Word. ■

To install:

98 2000 NT XP

WinShark crm Lite

The software should autorun when you click Install on the DVD menu. If not, go to Start, Run. In Windows 98, type E:\winshark\98web\setup.exe. In Windows 2000/NT/XP, type E:\winshark\ntweb\setup.exe (where E is the letter of your DVD-ROM drive).

System requirements

300MHz Pentium III; Windows 98/NT/2000/XP; 64MB RAM; 100MB disk space; IE 5.0 or later

The screenshot shows the 'Basic Details' tab of a contact record. The 'Reference' field contains 'CKL00000001'. The 'Name' field contains 'C K L Consulting Limited'. The 'Contact' field contains 'The Managing Director'. The 'Display' field contains 'C K L Consulting Limited'. Below the form are tabs for 'Address Details', 'Contact Details', and 'Correspondence Address'.

← You can use WinShark to store all of your customers details such as the name of your main contact, their telephone number and email address

↙ Track relationships between your clients – for example, packaging makers to envelope suppliers or hardware and software companies

DVD AllWebMenus Lite 1.3

FULL PROGRAM

Want to make your website stand out from the competition, attract more visitors and hold on to them for longer? Once was the time when creating a compelling web page required expertise in coding. But thanks to easy-to-use tools like AllWebMenus Lite, even novices can create professional navigation aids for their site.

AllWebMenus is a web menu builder that requires no DHTML or JavaScript experience. Even if you don't know what those two words mean, this uncomplicated software makes site building easy. More advanced users will appreciate it too.

Compatibility is all-important when it comes to the web. You want to be sure that your menus will work no matter which browser your visitors are using. Fortunately AllWebMenus creates menus that work across all DHTML-compatible browsers. That means that even people who are using less common browsers like Mozilla and Opera will be able to view and use menus created using this tool.

Creating menus is simple. You decide how you want your menu to look using an intuitive, tree-like approach. Changing styles, layout, menu position and all the

other characteristics is achieved by playing around with the properties – most have simple drop-down menus, so you can choose from a range of options. For example, you can select which part of your menu will pop up a submenu or make one button link to another page rather than a submenu.

You can achieve flashy effects using AllWebMenus by opting for one of the animated, coloured menus. You can also choose where you want them positioned – for example, horizontally or vertically on your page. If all this sounds a bit too much like hard work, try a predesigned template from the Style Gallery.

Once you are happy with the menus you've created use the Compile Menu and Link Menu commands to add them to your web pages. ■
