

# Here's how

The Here's how section combines workshops, Helpline and The Advisors. We'll take you step-by-step through specific projects as well as troubleshooting readers' problems, while our independent experts report on what's new in their particular fields of computing

## The Advisors

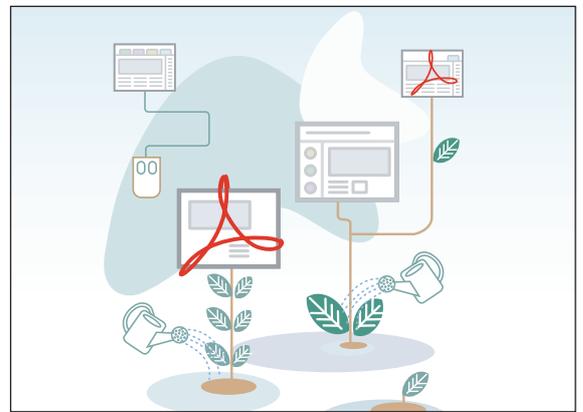

**114** We help you get the most from your technology as well as keeping you up to date on what's coming up and what to look out for in the future. We've scoured the country from Edinburgh to Cornwall to find you the best people in their respective fields. These guys eat, sleep and breathe technology and they're here every month to report their findings to you. What they don't know about technology simply isn't worth knowing.

## Workshops

**134** Step-by-step guide to upgrading your audio and graphics setup.

**142** Make more of DTP documents by publishing them on the web and creating PDFs or e-books.

## Helpline

**148** Our Helpline guru just loves to solve computing crises. If you have a PC-related query and need help, write to Julian Moss at [pcadvisor\\_letters@idg.com](mailto:pcadvisor_letters@idg.com). Remember to mark your email 'Helpline' in the subject header.
