TOP 10 MONOCHROME LASER PRINTERS

1 Brother HL-1650

The HL-1650 continues to reign in the top spot for yet another month. It is a large device and weighs a hefty 14.5kg. However, it's a well-built, sturdy model so it should be up to coping with a heavy workload. It comes complete with a built-in duplex unit, which is a real bonus if you need to do double-sided printing. There's a 250-sheet input tray on the front of the printer, which feeds through to a 150-sheet output tray on the top of the unit. Considering its price, the maximum resolution of 600x600dpi (dots per inch) is not that high, but text is crisp and the the Brother can churn out up to 13ppm (pages per minute). Toner spread is uniform with no streaking, even on tricky graphics and images. It's also a cheap printer to run, costing just under a penny a page.

TOP 10 COLOUR INKJET PRINTERS

1 Canon Bubble Jet S630

The S630 combines high print speed with a quality of output that's second to none. It's in the performance category, though, that this printer truly distinguishes itself from the crowd. Full-colour prints are flawless and beautifully defined, thanks to the effective MicroFine Droplet Technology, which delivers microscopic ink droplets (measuring five billionths of a millimetre) on to the paper. The text output may not match that of a laser printer, but it remains as clean as any inkjet's. If there is a slight niggle, it's that with the Bubble Jet's high price tag you might expect lower running costs. Having said that, the rates of 2.1p and 6.2p for a page of mono and colour respectively are still far from excessive.

TOP 10 MONOCHROME LASER PRINTERS

2 Kyocera Mita FS-1000+

The FS-1000+ is not the cheapest printer in the chart, but its performance is comparable to that of a more expensive model. It boasts a consistently good combination of speed and quality, and beats all the competition on time to print the first page of each job. A final bonus is that it's economical, offering the second-cheapest running costs, after the third-placed Brother.

3 Brother HL-1030

The HL-1030 strikes a pleasing balance between speed and quality. It's not the fastest or best-quality printer, but it provides good results for both. The HL-1030 has a claimed print speed of 10ppm (pages per minute) and our tests showed this estimate wasn't too far from the truth. Toner spread is even and the printer produced a good contrast between light and dark. As a result, the print jobs on graphics and photographic images were of a quality comparable to more expensive models.

4 Canon LPB 810

The LPB 810 has been stripped of all superfluous features; there's no LCD display, buttons or status lights – so all printing adjustments are made via the software package. This lack of options means that the machine is simple to set up, and the no-frills software, while limited, is effective. But the real selling point for this printer is its space-saving footprint. The U-shaped paper feed keeps it compact and, at 6.2kg, it is the lightest printer in our chart.

5 HP LaserJet 1200

The 1200 is pricey, but it does come with 8MB of onboard memory and offers true 1,200x1,200dpi (dots per inch) resolution. These high-end features produce a print speed of 11.5ppm (pages per minute), with crystal-clear quality. Running costs are high – 2.36p per page – making the HP almost twice as expensive to run as any of the other printers in the chart. If you have the money then it's a good printer, but steer clear if your budget is tight.

TOP 10 COLOUR INKJET PRINTERS

2 Epson Stylus Color 680

The Epson Stylus Color 680 has retained a position among the elite for over a year. It's no real surprise considering that the 680 is almost a third of the price of the highly-rated Canon S630 and HP PhotoSmart P1215. The biggest problem you'll find with the Epson Stylus is its speed. Even the quoted print speeds – 8ppm (pages per minute) for mono and 7.7ppm for colour – look modest; the actual speeds are a sluggish 5ppm and 2ppm respectively.

3 HP PhotoSmart P1215

The HP PhotoSmart P1215 sets a high standard for all-round excellence. It comes complete with card slots, allowing you to print out your digital camera snaps without the need to connect to a PC. It also provides facilities for CompactFlash, SmartMedia and IBM Microdrive cards. The P1215 offers outstanding performance, with vibrant graphics and clean character definition.

4 Epson Stylus Color C80

With print speeds of 5ppm (pages per minute) in mono and 1.5ppm in colour, the C80 isn't the fastest inkjet in our chart. However, Epson's inkjets have always been geared more towards producing high-quality images than high-speed printing and, in this regard, the C80 certainly isn't any disappointment. If you're happy to settle for a printer that takes its time, you should be rewarded with excellent results.

5 HP DeskJet 995c

The HP DeskJet 995c's Bluetooth option means that the printer can communicate with similarly equipped devices wirelessly. A standard resolution of 600x600dpi (dots per inch) can be bumped up to 2,400x1,200dpi for photo printing and, although the 995c doesn't live up to the manufacturer's quoted print speeds, it's nippy on high-resolution jobs. It's a fairly niche model, but we're sure those who need its features won't be let down. It's expensive to buy and run, but the 995c is not about value for money.
