TOP 10 MONOCHROME LASER PRINTERS
1 Brother HL-1650

The HL-1650 continues to reign in the top spot for yet another month. The Brother is a large device and weighs a hefty 14.5kg. However, it's a well-built, sturdy model so it should be up to coping with a heavy workload. It comes complete with a built-in duplex unit, which is a bonus if you need to do double-sided printing. There's a 250-sheet input tray on the front of the printer, which feeds through to a 150-sheet output tray on the top of the unit. Considering the HL-1650's price, the maximum resolution of 600x600dpi (dots per inch) is not that high, but text is crisp and it can churn out up to 13ppm (pages per minute). Toner spread is uniform with no streaking, even on tricky graphics and images. It's also a cheap printer to run, costing just under a penny a page.

TOP 10 COLOUR INKJET PRINTERS
1 Canon Bubble Jet S630

The S630 combines high print speed with a quality of output that's second to none. It's in terms of performance, though, that the Canon BubbleJet truly distinguishes itself from the crowd. Its full-colour prints are flawless and beautifully defined, thanks to the effective MicroFine Droplet technology, which delivers microscopic ink droplets (measuring five billionths of a millimetre) on to the paper.

The text output may not match that of a laser printer, but it remains as clean as any inkjet's. If there's a slight niggle it's that, with the Canon's high price tag, you might expect lower running costs. Having said that, the rates of 2.1p and 6.2p for a page of mono and colour respectively are still far from excessive.

TOP 10 MONOCHROME LASER PRINTERS
2 Kyocera Mita FS-1000+

The Mita FS-1000+ may not be the cheapest printer in the chart, but its top-notch performance is comparable to that of a more expensive model. The Kyocera boasts a consistently good combination of speed and quality, beating all the competition on time to print the first page of each job. A final bonus is that it's economical, offering the second-cheapest running costs after the third-placed Brother.

**3** Brother HL-1030

The HL-1030 strikes a pleasing balance between fast output and decent results. It's not the quickest or best-quality printer, but the Brother provides good results for both. The HL-1030 has a claimed print speed of 10ppm (pages per minute) and our tests showed this estimate wasn't too far from the truth. Toner spread is even and the printer produced a good contrast between light and dark. As a result, the print jobs on graphics and photographic images were of a respectable quality.

**4** Canon LPB 810

The LPB 810 has been stripped of all superfluous features – there's no LCD (liquid crystal display), buttons or status lights – so all printing adjustments must be made via the Canon's software package. This lack of options means that the machine is simple to set up and the no-frills software, while limited, is effective. But the real selling point for the Canon LPB 810 is its space-saving footprint. The U-shaped paper feed keeps it compact and, at 6.2kg, it is the lightest printer in our chart.

**5** HP LaserJet 1200

The LaserJet 1200 may be a pricey device, but it does come with 8MB of onboard memory and offers true 1,200x1,200dpi (dots per inch) resolution. These high-end features produce a print speed of 11.5ppm (pages per minute), with crystal-clear quality. However, running costs of 2.36p per page make the HP almost twice as expensive to run as any of the other printers in the chart. If you have the money then the 1200 is a good choice of printer, but steer clear if your budget is tight.

TOP 10 COLOUR INKJET PRINTERS
2 HP PhotoSmart P1215

Epson's Color 680 model drops out of the chart this month, clearing the way for the PhotoSmart P1215 to step in. The HP sets a high standard for all-round excellence. It comes complete with card slots, allowing you to print out your digital camera snaps without the need to connect to a PC. It also provides facilities for CompactFlash, SmartMedia and IBM Microdrive cards. The PhotoSmart offers outstanding performance, with vibrant graphics and clean character definition.

**3** Epson Stylus Color C80

With print speeds of 5ppm (pages per minute) in mono and 1.5ppm in colour, the C80 isn't the fastest inkjet in our chart. However, Epson's inkjets have always been geared more towards producing high-quality images than high-speed printing and, in this regard, the C80 certainly isn't a disappointment. If you're happy to settle for a printer that takes its time, you will be rewarded with excellent results.

**4** HP DeskJet 995c

The DeskJet's Bluetooth option means that this HP printer can communicate with similarly equipped devices wirelessly. A standard resolution of 600x600dpi (dots per inch) can be bumped up to 2,400x1,200dpi for photo printing and, although the 995c doesn't live up to the manufacturer's quoted print speeds, it's nippy on high-resolution jobs. The HP is a fairly niche model, but we're sure those who need its features won't be let down. The DeskJet may be expensive to buy and run, but then the 995c is not about value for money.

**5** HP DeskJet 920c

The 920c's price tag may be a trim £76, but frequent users will pay in the long run. At 4p for a page of text and 5.5p for colour, it is going to cost you almost twice as much to generate a print from this model as say, the Canon S630. The 920c, however, produces plenty of speed for its price – printing off 7ppm (pages per minute) of text and 2ppm in colour at the lowest resolution. The HP DeskJet isn't a good buy for high text quality or for cheap running costs, but it is suited to high-speed printing.
