MONOCHROME LASER PRINTERS

1 Brother HL-1650

 At 14.5kg the Best Buy HL-1650 is a large device, but it's well-built and sturdy so it should cope with a heavy workload. It comes complete with a built-in duplex unit – a bonus if you need to carry out double-sided printing, which can be both more economical and professional-looking. There's a 250-sheet input tray on the front, which feeds through to a 150-sheet output tray on the top of the unit. Considering the HL-1650's price, the maximum resolution of 600x600dpi (dots per inch) isn't high, but text is crisp and it churns out up to 13ppm (pages per minute). Toner spread is uniform with no streaking, even on graphics and images. This is also a cheap printer to run, costing just under a penny a page.

COLOUR INKJET PRINTERS

1 Canon Bubble Jet S630

 Removed due to availability problems last month, the S630 returns with its combination of high print speed and good-quality output. It's in terms of performance, though, that the Bubble Jet distinguishes itself from the crowd. Its full-colour prints are flawless and well defined due to the MicroFine Droplet technology, which delivers microscopic ink droplets (measuring five billionths of a millimetre) on to the paper. The text output may not match that of a laser printer, but the S630 remains as clean as any inkjet's. A small niggle is that, with the Canon's slightly high price tag, you might expect lower running costs. Having said that, the rates of 2.9p and 5.4p for a page of mono and colour respectively are still far from excessive.

 **MONOCHROME LASER PRINTERS**

2 Epson EPL-5900

 Laser printers may be known for their clean output, but it's still rare to see a sub-£300 model that offers resolution support above 600x600dpi (dots per inch). Not afraid to break away from the crowd, Epson has produced a tremendous printer capable of achieving 1,200dpi. The EPL-5900 achieves a print speed of 11ppm (pages per minute) at 600x600dpi, which is only bettered by the HP LaserJet 1220. At just £269, the EPL-5900 delivers a fine performance, winning our recommendation.

3 Kyocera Mita FS-1000+

The Mita FS-1000+ may not be the cheapest printer in the chart, but its top-notch performance is comparable to that of a much more expensive model. The Kyocera boasts a consistently good combination of speed and quality, beating all the competition on time to print the first page of each job. A final bonus is that it's economical, offering very cheap running costs.

4 Brother HL-1450

Brother gets another chart entry with the low-cost HL-1450. It might not have the speed to match its rivals, but it's easy to use and has low running costs. Despite the decent maximum resolution of 1,200x600dpi (dots per inch) we got mixed results from our print tests. At 300dpi printing is good, but the default setting when printing at 1,200x600dpi is extremely dark. The HL-1450's print speed of 9ppm (pages per minute) proves that it's not a speed demon, but the Brother is still a great budget option.

5 HP LaserJet 1220

If you can get over the LaserJet's high price and running costs, this versatile printer could be a good choice. Though not labelled as a multifunction device, it does have an additional scanner and copier facility. The maximum resolution of 1,200x1,200dpi (dots per inch) is complemented by a quoted print speed of 14ppm (pages per minute). Unfortunately the 1220 loses points for its toner, which is expensive and only lasts for 3,500 pages, so running this printer is almost twice as costly as some of the competition.

 **COLOUR INKJET PRINTERS**

2 HP PhotoSmart P1215

 HP's PhotoSmart P1215 drops down to number two this month after the Canon S630 re-enters the chart, but still sets a high standard for all-round excellence. It comes complete with memory card slots, allowing you to print out your digital camera snaps without the need to connect to a PC. It supports CompactFlash, SmartMedia and IBM Microdrive cards. The incredibly detailed control panel is also superior, giving instant access to its many options. The PhotoSmart offers outstanding performance, with vibrant graphics and clean character definition, and its actual print speeds are reasonable. The installation routine will also be welcomed by printer newcomers – it has videos and tutorials to get you up and running.

3 Lexmark Z55 Color Jetprinter

The Z55 may seem over-shadowed by the more advanced Z65, but it offers similar performance for a lower price. At top speed, the Lexmark can generate 9ppm (pages per minute) of text and 7.5ppm of colour graphics. The printer supports a resolution of 3,600x1,200dpi (dots per inch) on glossy media, or 3,600x600dpi using standard paper, but image quality doesn't justify this. At 4.9p a page, colour printing is cheaper than on more expensive models. Offering almost the same level of image quality and near-identical speeds to the Z65 for £26 less, the Z55 beats its sibling to a higher chart position.

4 Epson Stylus Color C80

With print speeds of 5ppm (pages per minute) in mono and 1.5ppm in colour, the C80 isn't the fastest inkjet in our chart. However, Epson's inkjets have always been geared more towards producing high-quality images than high-speed printing and, in this regard, the Stylus Color isn't a disappointment. If you're happy to settle for a printer that takes its time, you'll be rewarded with excellent results.

5 Lexmark Z65 Color Jetprinter

Lexmark makes some fairly brave claims for its brand new Z65 printer, like the maximum resolution of 4,800x1,200dpi (dots per inch). But in reality the Z65 has a few catches. The mono print speed of 9.6ppm (pages per minute) is the fastest in the chart, but the output at the fastest levels is faint and low quality. Thankfully, the standard mode generates high-quality text and graphics. But for low-price printing facilities, the Z65 isn't the best bargain in the charts.
