Burn, back up and duplicate all your data to CD courtesy of DiscJuggler then fire up ViaVoice for a great data input alternative to the keyboard. For readers with the DVD edition we've another helping of our popular UFO Diaries series, plus some great games demos

cover disc: CD

As we store more and more data on our PCs, from documents and presentations to digital photographs and audio clips, the need to make backups of these vital files is greater than ever.

This month we have got a full version of DiscJuggler, a program that makes burning and backing up CDs simple. And that's not all – there's also a copy of IBM's famous speech-recognition program, ViaVoice.

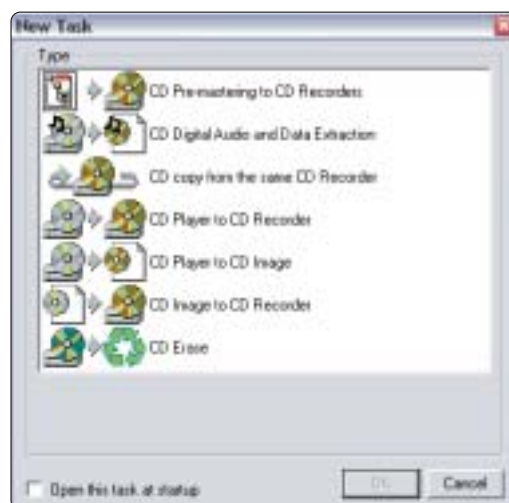

DiscJuggler 3.5

DiscJuggler is designed to help you keep copies of all your important data, and to let you make duplicates of any discs that are really precious – wedding or christening photos, for example. It's also a great way to make multiple copies of discs that you want to circulate to colleagues in the office or send to friends and relatives.

For example, you could copy a presentation on to several discs, so you can hand it out to clients once you have shown it to them. It's also a great way to share photos – you could send a disc of a family event to relations who don't have email or want high-resolution copies of the snaps.

← Forget the keyboard – you can speak any document into your PC with IBM ViaVoice

↑ DiscJuggler lets you perform a variety of disc burning tasks, from backup to CD recording and copying

IBM ViaVoice Millennium Standard 7.0

IBM was one of the pioneers of speech recognition in the 1970s and it is one of the few companies still persevering in this area today. Thanks to the company's wealth of expertise and commitment to making its software as accurate as possible, ViaVoice is one of the best programs around.

With the full version on our cover disc, you can find out for yourself just how well ViaVoice can turn talk into text. ■

Cover disc liability

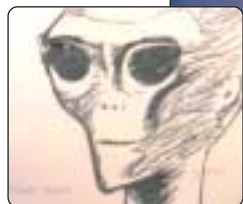

The CD-ROM and DVD on the cover of PC Advisor are supplied as is, subject to the following terms and conditions. The CD-ROM and DVD are provided as free items to readers of PC Advisor for their personal use, and may not be resold or copied for distribution. The publisher shall have no liability without limitation for any losses or damage arising from using these software programs or taking advice from the cover disc helpline, including any loss of profit, damage to equipment or data, interruption of business, or any other damage, direct or accidental.

It is recommended that you back up any programs and data on your hard disk before installing this software. Where telephone numbers are given for registration of cover disc software, these lines may only be valid for a limited period. PC Advisor cannot be held responsible for discontinued offers. This does not affect your statutory rights.

cover disc: DVD

Bringing you everything on the cover disc plus a host of exciting games demos and exclusive video footage, our DVD edition is crammed with unmissable extras. There's part four of our exciting UFO film series, our pick of the latest games demos and a peek at the soon-to-be-released *Minority Report* game.

← ↑ Do strange objects in the night sky bring visitors from other planets?

UFO Diaries: Close Encounters

Are aliens among us? Did Roswell really happen? How many UFO sightings are hoaxes and how many are real? Our exclusive DVD looks at how scientists discover the truth behind UFO sightings, sorting the credible stories from the fakes as eye-witnesses recount their encounters with extraterrestrial life.

The final chapter discusses whether aliens come as friends or enemies and examines how our opinions of extraterrestrial beings and UFOs have been moulded by other people's tales of unexplained activities such as crop circles and the historical account of Roswell. The truth is out there, but as more hoaxes are

recorded scientists never seem to get any closer to finding it. Instead we are left to sit back and wonder – are we really alone in the universe?

Minority Report trailer

The Minority Report by Philip K Dick is one of science fiction's most prolific books. It made people ask whether the future could really be a place without crime. But is it fair to convict a person of killing someone before they actually have?

Watch the trailer and experience what it's like to be wrongly convicted of a murder you haven't yet committed. Sadly you'll have to wait until August for the game to be released. ■

How to load the programs on the CD and DVD

1 Insert the disc into your CD-ROM or DVD-ROM drive. The *PC Advisor* main menu screen should appear after a few seconds. If not, type `d:\master.exe` (where D is the letter of your CD or DVD drive).

2 Click Continue at the Welcome screen. Running along the top of the next screen you will see a set of tabs, which you click on to access the various sections.

3 Click on the section you want to view and then select the program you want to install. You will then see an Install button; click this to load up the program. Click View to download a program from the relevant website.

4 If you experience any problems, refer to the manual instructions on pages 172-177 or see the Read Me file. Alternatively, use Windows Explorer to find the program executable you require and double-click to launch it. If the program still won't load visit our website or call the helpline. Please remember that *PC Advisor* can only assist with installation difficulties.

How to access the DVD video

1 To access the DVD's video content, simply load the DVD player that came with your PC and press Play. Then from the menu screen choose the chapters that you want to view.
