Quality Windows Software

## d-Barcode *barcode image creators*

These enables you to create fully resizeable barcode images for most common barcode types:

*with d-Barcode Standard version:*

1. Create the image in dBarcode and copy it to the clipboard ready for pasting into other applications, print a proof copy, or save it as a WMF, PCX, BMP or EPS file for loading into other applications.

*with d-Barcode Pro version*

1. as with Standard version above, *or*

2. Choose *Insert Object* within your OLE application (eg. Word for Windows, Excel, Access, CorelDRAW, etc.) and choose dBarcode object from the list of objects. dBarcode Pro supports In-Pace editing, *or*

3. Create the image using Visual Basic's *CreateObject* command and set all the barcode parameters with simple Basic commands.

*d-Barcode Pro 32* is a 32 bit version of d-Barcode Pro, suitable for use with Windows 95 and Windows NT - but not Windows 3.1.

### System requirements

Requires Microsoft Windows 3.1 or later.

Standard versions can copy barcode image to clipboard or save image as metafile (.WMF). Pro version is also an OLE server (OLE 2 Embedded Server, In-Place Server and Automation facilities) requires an OLE 2 compatible client application such as Word for Windows 6.0 or Visual Basic 3.0 or later. d-Barcode Pro 32 requires Windows 95 or Windows NT 3.51 or later.

9 781234 567897

Supports EAN 8, EAN13, JAN, ISBN, ISSN, UPCA and UPCE (all with 2 and 5 digit supplementaries), EAN 128, Code 39, extended (full ASCII) Code 39, Code 93, Code

11, Code 128, Code B, ITF-14, ITF-6, 2 of 5, Interleaved 2 of 5, 3 of 9, PostNet, FIM, Royal Mail 4 State, Telepen (numeric and ASCII) and MSI (Modified Plessy). Optional SISAC library available.

- Checkdigits may be calculated automatically and shown or hidden (for codetypes which permit this).
- Barcodes may be rotated left or right or inverted. (TrueType or compatible fonts required for text rotation)
- Margin indicators and bearer bars may be turned on/off for codes which support these items.  
Bar width control for wet-ink printing allows 0 - 50% width reduction.
- Font properties, bar colour and background colour may be user selected
- Nominal size option for codes which specify a nominal (100%) size.
- ISBN codes may also be generated from ISBN numbers.
