

CRACKERJACK

CJ_DEMO.DOT TEMPLATE

IMPORTANT

Before you can use Crackerjack you MUST initialize your copy to run with your local version of Word. (This file and all the other Crackerjack files should be in a temporary directory ... NOT in any of your Word directories.)

Install by clicking the button below.

As mentioned in the note above, you will be asked if you would like an "Attach Crackerjack Template" button added to your Standard toolbar.

The button then, when clicked, will

1. Open Crackerjack,
2. Display three of the Crackerjack toolbars
3. Copy the contents of your current document into Crackerjack,

OR

Open a blank new document in Crackerjack if you don't have any documents open so that you can immediately begin to create, edit and/or convert to HTML.

If you already have an Attach Crackerjack Template button installed in your standard toolbar, just click "Ok " (you'll be asked in a moment) to reinstall the new Attach CrackerjackTemplate button and enable the features described above.

Do NOT DELETE anything in this document. It is essential to the successful running of the program.
