

Outlook Anywhere

it's time to leave the desk –
and your competitors – behind

Three world-leading companies, HP, Microsoft and Vodafone, have combined their expertise to bring you Outlook Anywhere. An affordable mobile office solution that delivers increases in productivity to help your business stay ahead of the competition.

It empowers your people by placing Microsoft Outlook functions into their hands at all times via the iPAQ Pocket PC. Giving them the tools, information and real-time communications they need to respond quickly to situations and customers, thereby increasing customer satisfaction, and make your business more agile.

It's time to leave the desk – and your competitors – behind.

Empower your business

Discover the benefits of Outlook Anywhere

Outlook Anywhere is a fully managed service, placing Microsoft Outlook into your employees' hands at all times via the HP iPAQ Pocket PC. The benefits are immediate and far-reaching – the case study below demonstrates how Outlook Anywhere gave Huntswood Outsourcing Solutions real business advantage with minimal outlay and training.

Case Study- Huntswood Outsourcing Solutions

Transforming the way we do business

Huntswood Outsourcing Solutions, a specialist supplier of outsourcing solutions to financial services clients, has completed a trial of Outlook Anywhere for its senior managers and sales consultants. The company was considering an email-only solution, but decided to try Outlook Anywhere as it delivers more functionality.

Employees found the solution invaluable when out on the road or with clients – estimating an increase in productivity of between 10 and 25 per cent. People were more prepared for their meetings,

and if they needed additional documentation at a client site, they simply requested it on their iPAQs.

With this new-found ability to retrieve vital documentation, and to contact board members by email for executive decisions, Outlook Anywhere places Huntswood in an unrivalled position to win business over its competitors.

Huntswood Outsourcing Solutions, impressed with Outlook Anywhere, is expanding the solution to all senior consultants.

Mobility

“It’s made my working life infinitely more productive.”

Huntswood Outsourcing Solutions, Consultant

Freedom

'We achieved our goal of becoming familiar with the technology but what really surprised us were the benefits it gave to users.'

Peter Crutchfield – Head of IT, Marie Curie Cancer Care

Empower your employees

Give them anytime, anywhere access to important information and communications

Business today is more complex and disparate than ever before. You have more partners, suppliers and customers, in more locations to deal with. So to keep up, your company has become increasingly, impressively mobile. Your employees are travelling more, meeting more people, and doing business wherever there is business to be done. But in spite of it all, they're just not maximising their productivity and using their time to best effect. Why not?

The answer is, they may be mobile, but they aren't effectively connected to your business systems. Outlook Anywhere empowers them with real-time access to their desktop functions – to their email, calendar and contacts – wherever they are. So they can access the right information, share it with the right people, and make the right decisions at the right time, all the time. It's true mobility, allowing them to be more productive from day one.

“Every one is easily contactable, you can easily reach board members for decision making.”

Daniel Harrison - IT Manager, Huntswood Outsourcing Solutions

From only £1.00 per person per day*

An affordable mobile solution that will pay for itself over and over

Think about it. Your people can have the communication tools and information they need to do business better, stay in touch more easily, and be generally more productive – and all for less than the price of a daily cup of coffee.

How it works

The solution uses a Bluetooth enabled HP iPAQ Pocket PC paired to a Bluetooth enabled Sony Ericsson T68i mobile phone[†].

This simple, wireless set up provides seamless and secure synchronisation to email, calendar, contacts and tasks direct to the iPAQ device. Users connect to the office via an HP Proliant server running the Microsoft Mobile Information Server (MMIS) software, which in turn allows access to Microsoft's Exchange 2000 Server.

Always-on connection

Using a GPRS connection, users have 'always on' access to information and email on their iPAQs with no dial-up required. Billed by the megabyte and not 'pence per minute' airtime,

users can keep a control on costs and do not pay for time spent reading or composing files. The connection is monitored and supported 24/7 to assure you of the service availability and reliability your business demands.

Secure data

In addition to complying with industry security standards, Outlook Anywhere provides additional security through user authentication via the iPAQ Pocket PC.

Full solution support

The Outlook Anywhere solution includes the pre-configuration of the iPAQs and server, end user telephone support, and training from your reseller. In short, everything you need to adopt Outlook Anywhere quickly and easily to your mobile workforce.

Scalable and future-ready technology

The solution provides a scalable and future-ready managed gateway that ensures ongoing compatibility, both with evolving industry standards and with your long-term, strategic business needs.

* From £1 per day, per person, based on a 40-user system, excluding network and call charges.

† The Outlook Anywhere package includes a Sony Ericsson T68i, although the solution can work with any bluetooth enabled phone and can be adapted to meet individual requirements.

Affordable

HP, Microsoft and Vodafone

A mobile communications solution you can trust to deliver results

Outlook Anywhere brings together the best technology, service and know-how from three of the most forward-thinking companies around. The result is a fully integrated, affordable mobile office solution that will empower your people and help them work more productively.

The Outlook Anywhere package comprises a powerful combination of three elements.

HP's iPAQ H3970 and Proliant servers, for the solution infrastructure

The most expandable Pocket PC is now brighter and even more versatile, boasting a fast 400MHz Intel® processor, 48MB flash ROM memory and up to 18 hours battery life. The iPAQ H3970 features integrated Bluetooth technology for wireless connection and fast, hassle-free operation. In addition, HP provides

all the necessary hardware and infrastructure needed to support the Outlook Anywhere solution, including the installation of Proliant servers.

Microsoft's Mobile Information Server (MMIS), for real-time access to all your Microsoft Outlook functions

MMIS brings the functionality of office-bound PCs to the latest generation of mobile devices, so no matter where you are, you can securely gain access to your e-mail messages, contacts, schedules and, of course, the Internet.

By channelling their joint expertise, HP, Microsoft and Vodafone have created an affordable and effective mobile office solution that will increase the productivity of your people and keep your business one step ahead of the competition.

Vodafone's managed mobile service, for reliable, secure, mobile networking

Vodafone offers a proven range of dedicated voice and data services. In fact, Vodafone is the leading mobile communications supplier to businesses, with 56% of the corporate market share; over 16 years' experience of delivering business solutions, excellent network coverage, and consistently high levels of customer satisfaction.
