The new era...

At last, a PC that adapts to *you*

How do you want to work today? With a desktop, a notebook or a Pocket PC? With a paper notepad and pen? Or better yet, with all of them?

The Compaq Tablet PC TC1000, the versatile, ultra-mobile new business tool that adapts to suit your own style of working.

Its innovative capabilities enable you to make handwritten notes in existing Windows applications by using it as a notepad, then save your jottings as "digital ink" or transform them

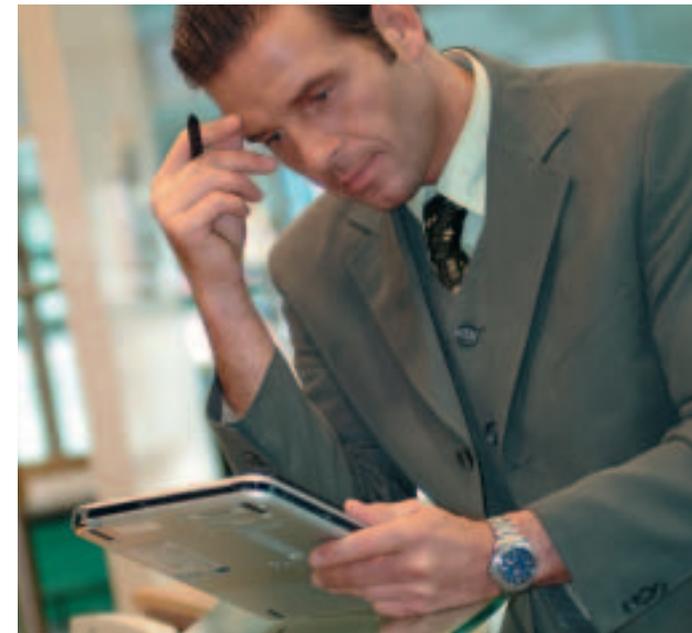

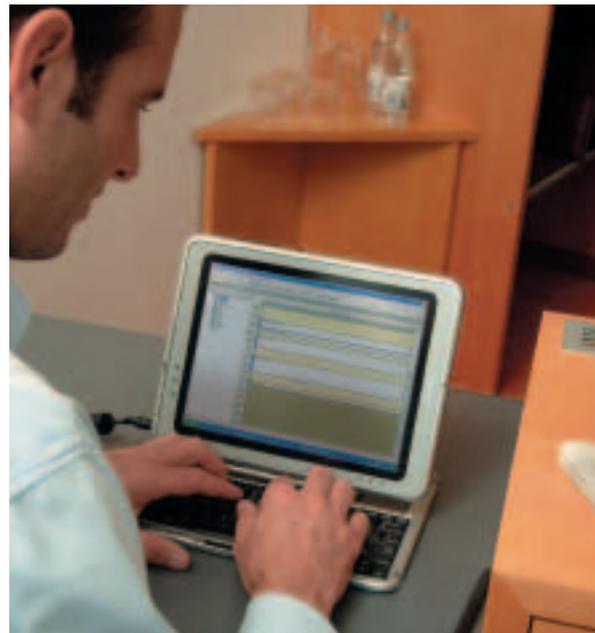

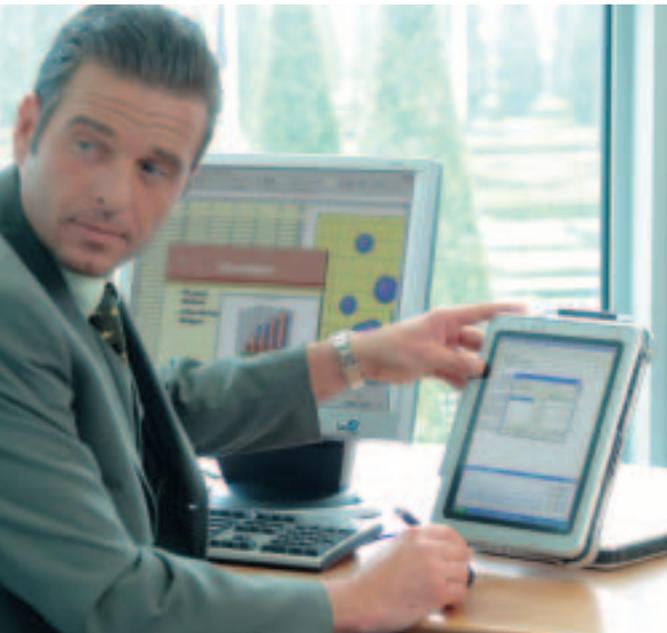

into typed text*. You can even record voice notes, dictate comments to voice-recognition software, as well as access and share your information wherever you go. You'll save time, react quicker to great ideas and avoid duplicating your efforts.

Combining the power and functionality of a full-function PC with the convenience and simplicity of a pen and paper, the Compaq Tablet PC transforms effortlessly from desktop, to notebook, to digital notepad and back again, enabling you to work in more ways and places than ever before. It's ideal

for fast-paced business environments where time is money, sparing you the hassle of setting up different IT devices for specific tasks.

Stylishly designed and comfortable to hold, it's easy to deploy in any environment. Move your business into the new era, and aim higher with a PC that works the way you choose.

* Please refer to the digital ink illustration on the following page.

Moving your business ahead

Where do you want to work? The office, the meeting room, the hallway, the train station? The Compaq Tablet PC lets you choose, and adapts to suit your location. Ultra-thin, light and portable. It's designed using the very latest mobile technology, for fast, easy transition between its hot-docked desktop, notebook and notepad configurations. Just grab it and go, with or without the removable keyboard.

> Travel with ease – and confidence

You can be sure of complete compatibility and reliability. Built using industry-standard hardware and software, the Compaq Tablet PC has been extensively tested for flawless operation out of the box, including a short boot-up time and around five hours* of battery life. Its proven strength can stand up to the rigours of daily use, with a shock-resistant, hard-tempered glass display and magnesium-alloy casing that is twenty times stronger than plastic. Backed by world-class HP services and solutions to help simplify your IT, it's the only certain choice.

> Performance that keeps pace

It's a powerful ultra-portable with an integrated NVIDIA graphics controller plus dedicated memory, providing rich graphics support for daily business tasks and more demanding applications. Powerful processors perform even your most intensive tasks, wherever they take you, and you can create, edit and store safe in the knowledge that you've got plenty of storage capacity.

> Stay in touch

Stay connected while you're away from your desk. The Compaq Tablet PC connects effortlessly to your network via integrated 802.11b wireless technology, with internal antennas for easy upgrade to new wireless standards. On the road, you can plug into your mobile network using a wireless WAN PC Card. Stay wirelessly connected to your PAN with a Bluetooth Compact Flash or PC Card.

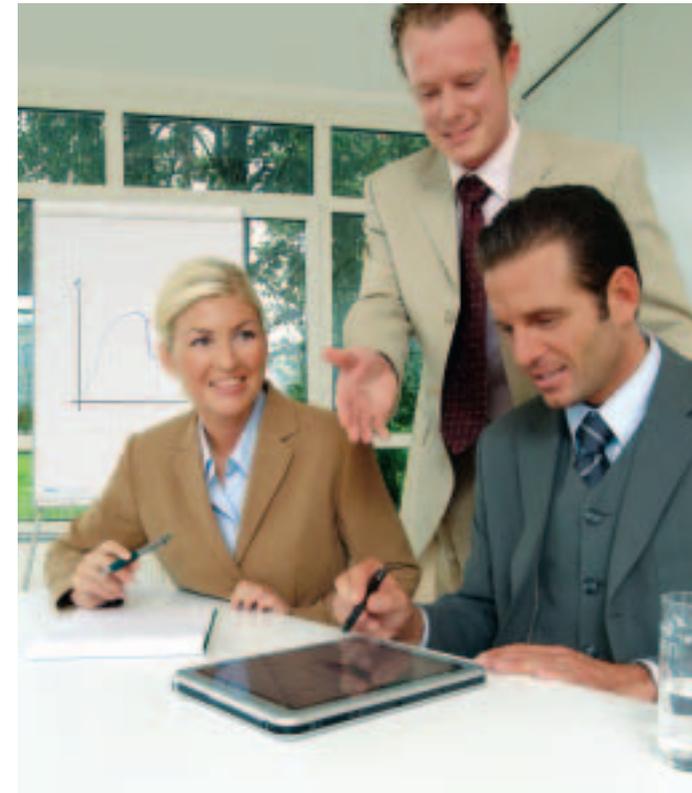

> Effortless expansion when you need it

Back in the office, use the Compaq TC1000's desktop configuration to incorporate notes and tasks from meetings. Expand its functionality with the optional docking station, add a full-sized keyboard, mouse and monitor for easy-to-use dual-monitor capabilities, or connect the External MultiBay cradle for additional hard drive, CD-Rom or DVD-ROM. It's even fully compatible with common HP Evo notebook options.

> Secure and easy-to-manage

The Compaq Tablet PC saves you the hassle of PC management. Easy-to-download manageability agents ensure easy integration and operation in any enterprise environment, with a host of integrated security features to protect it once it's in place.

* Typical usage in a non-wireless environment.

Greater achievements... with a human touch

Think how much more productive you could be if every business task was done *your way*. Now enter the era when it can be.

The Compaq Tablet PC is the first ultra-mobile PC to bridge the gap between traditional computing and the way you naturally want to work. As well as carrying the power, performance and compatibility of a conventional desktop or notebook wherever you go, you can also interface with an intelligent notepad, making quick, time-saving notes in "digital ink" as soon as you have a great idea.

> Saves you time

Improve your overall efficiency and avoid duplicating tasks by working with technology the way **you choose**. Make handwritten notes on your Tablet PC screen as you would on a paper notepad, or write directly into existing applications such as PowerPoint, Word, Outlook and Excel. Once you've updated documents, you can process them however you like. Translate notes into text or save them as digital ink, then send them to your colleagues.

> Add your personal touch

Draw, scribble, design and exchange ideas on the go using digital-ink technology. Sketch out brilliant concepts, or simply jot down directions. You can change the ink colour, add highlights, insert spaces or italicise.

> No more searching for paper

Take as many meeting notes as you want. With ample storage space, your notes are all kept safely in one place for easy recovery. You'll never

> **Everything you expect from a PC... and more**

A powerful ultra-portable with all the capabilities of a desktop or notebook PC **plus** enhanced features and capabilities. The first PC to run on the powerful new Microsoft Windows XP Tablet PC Edition operating system, it includes the full Windows XP Professional feature set **plus** digital ink and speech-recognition capabilities and the ability to shift easily between form factors. It's every device you'll ever need, rolled into one. And because it's Windows compatible, it's easy to deploy and manage in enterprise environments, with no modifications.

> **Grab it and go**

There's no need to stop just because you're changing location. The Compaq Tablet PC is so thin and lightweight, with or without its detachable keyboard, that it can be used in places you'd never have imagined before. Move effortlessly from desk to meeting room to corridor, shifting the notepad's orientation to suit your location and staying connected with integrated wireless capabilities.

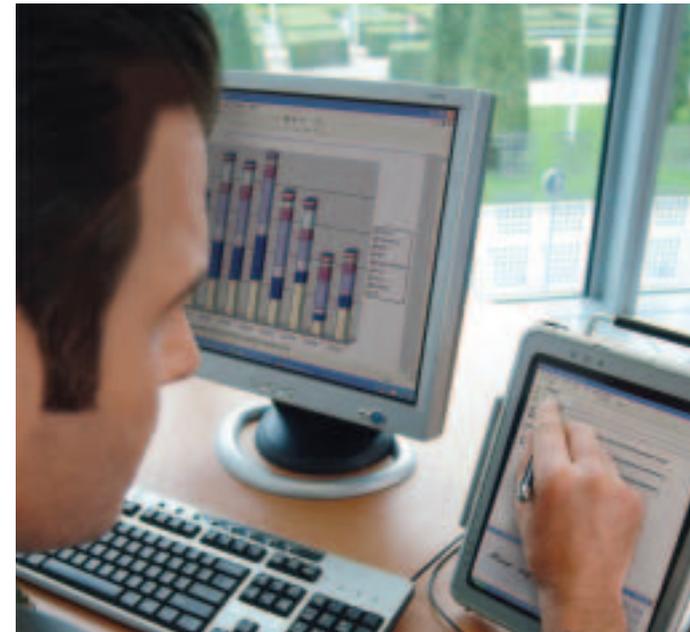

> **Work the way that suits you**

No matter how or where you work, the Compaq TC1000 shifts effortlessly between its desktop, notebook and digital-notepad forms. Slide it into the innovative, flexible docking solution for a full desktop experience, with no synchronisation required, and even utilise dual monitors support.

lose your jottings – just perform an electronic search for specific notes, rather than scouring scraps of paper or your notepad.

> **Improve business etiquette**

The casual, open way in which you use the Compaq Tablet PC means there are no barriers between you and your customers in the meeting room. No screen to block the view. No noisy or distracting keystrokes. Just the natural way you take notes in meetings – by putting pen to paper.
