

Register? Is it free?

Yes! **All TSW applications are free!** If this application is used for non-commercial purposes only, you can get a free registration code at www.tsware.net. This is 100% free, and by doing so, you will get rid of this nag-screen which is displayed on every startup until registered. If you're using a TSW application for commercial purposes, you are required to register by buying a Pro version. You can read much more about this at www.tsware.net, or at the Pro site at www.pro.tsware.net. So why do you have to register for personal use? To give me an idea of how many people are actually using the program. **TSW applications are made solely because of my wish to create software that people like and use.** The more people I can see using my software, the more time I will feel like spending on the project.

Can I support the TSW project?

If you really like this piece of software, please help me make it even better, by showing your support and making a donation. You can do this while getting a better experience with the software, by buying a personal Pro version (including full documentation and help files), or you can do it by simply donating an amount of your choice. Upon registering this application, you will receive further information about the Pro version and other ways of supporting TSW.
