

Is it free?

Yes! **All TSW applications are free.** The only thing that I require for my many hours of work is that you register the TSW programs that you wish to use, at www.tsware.net. It's 100% free, and serves only one purpose: for me to see how many people who use my programs. The TSW project is based on my desire to make programs that people like & use, so the more people that I see using my programs, and that's why I need you to show your support, by registering this program!

Enjoy WebCoder!!
