

To view more detailed information about a graphic included in an Image Integrator library, select the desired graphic on the Image Integrator palette and then choose Get Info from the Item menu, or double-click on the item. A dialog appears, listing information about the graphic, including the file's name, type, size, creation date, modification date, volume, full path name, and the creator. The dialog also displays a thumbnail-size preview of the graphic. Double-clicking on the graphic's preview launches the program that created the graphic to allow easy modification of the artwork.
