SECTION V HEALTH HAZARD DATA

EE 150

Threshold Limited Value None established for 70% Isopropyl Alcohol. For Pure Isopropyl Alcohol: TWA: 400 ppm (skin); 980 mg/m³ (air). Human, oral LDLo 2371 mg/kg.

Effects of Overexposure According to Merck Index, Eighth Ed. dyes of this class generally have low toxicity. Specific data is not available. To the best of our knowledge this materials' combined chemical, physical and toxicological properties have not been thoroughly investigated. **INGESTION AND INHALATION:** Of large quantities of the vapor may cause flushing, headache, dizziness, mental depression, nausea, vomiting, narcosis, anesthesia, coma. 130 mL. can be fatal. **EYES:** Liquid may cause irritation. **SKIN:** Repeated contact may cause irritation and cracking.

Emergency and First Aid Procedures **INHALATION:** Remove to fresh air; observe for 30 minutes for intoxication signs. Get medical assistance for serious exposure. **SKIN CONTACT:** Flush with water. **EYES:** Flush with water for 15 minutes, lifting lower and upper eyelids occasionally. Get medical attention. **INGESTION:** If swallowed, if conscious, give one or two glasses of water to drink, induce vomiting and call physician. Never give anything by mouth to an unconscious person.

UNUSUAL FIRE AND EXPLOSION HAZARDS

Vapors are heavier than air and may travel along the ground or may be moved by ventilation and ignited by pilot lights, other flames, sparks, heaters, smoking, electric motors, or ignition sources at locations distant from material handling point. **CAUTION!** Flame may not be visible in daylight. Fire or excessive heat may produce hazardous decomposition products; can react vigorously with oxidizing materials.
