

Dear Customer,

Thank you for requesting a copy of the current DATA on DISC CD-ROM. You may also find our automated support tools a useful source of technical information for our full product range.

*ST on LINE, the SGS-THOMSON Microelectronics **WWW (World Wide Web server)**, contains information on all of the Company's available products. If you have a Web browser (supported by Acrobat Search for CD-ROMs) installed on your PC and an internet connection, click on the hyperlink below to connect with ST on LINE.*

<http://www.st.com/>

If you don't have an internet connection you can still navigate through WEB on DISC by clicking on the hyperlink below.

WEB on DISC

WEB on DISC is a snapshot of ST on LINE and can be used to create your own internet web server.
