

# **DATA on DISC**

***Welcome to DATA on DISC, a portable documentation tool from SGS-THOMSON Microelectronics. The latest offering in our expanding range of services, DATA on DISC packs Product and Company information into the palm of your hand: the right data, at the right time, and right where you are.***

## ***The Complete Works from SGS-THOMSON***

***Compact and complete, DATA on DISC will contain a full library of Datasheets, Application Notes, the Shortform Catalog, Company information and more. A single disc houses some 630 megabytes of information, representing the equivalent of 3100 files, 31,000 pages of texts, tables and graphics with 16,000 links. Comprehensive updates will be made quarterly to provide the latest in product and development information. No more searching through your shelves, no more calls to the Documentation Department, DATA on DISC has it all !***

### ***Quick, Easy and On the Spot***

*High performance retrieval software ensures keyword searches of the whole disc in a few seconds. You can then cut and paste information from different documents to build a customized portfolio of data. Material can be mixed and matched to meet the precise needs of a design team, and then printed out via standard laser and PostScript printers for on-the-spot consultation.*

### ***For all Standard Platforms***

*Thanks to its compliance with the most widely used ISO 9660 media standards for data structuring, DATA on DISC is designed to be independent of the computer operating system. This CD-ROM is currently running under Windows3.1, Windows95, WindowsNT, SUN SPARC, SunOS, Solaris, HP-Series 9000, HP- UX. For you, our customer, this means little or no investment for adaptation to your software environment, plus the added benefit of immediate hardware integration.*

### ***Timely and Time-Saving Information***

*DATA on DISC technology offers all the advantages of on-demand resources at a fraction of the cost of its paper equivalent. Compact in size, it fits in your pocket and can go where you go. Easy to update, the latest information is always available - on your desk, on site, and on line. Both a timely and time-saving service for busy development teams, DATAon DISC can leverage far more from far less with the greatest of ease.*

*And by reducing unnecessary paper consumption, this service from SGS-THOMSON plays a role in the economical use of natural resources and in their lasting protection.*

*January 1997*

*Windows3.1, Windows95, WindowsNT are trademarks of Microsoft Corporation.  
SUN SPARC, SunOs, Solaris, are registered trademarks of Sun Microsystems, Inc.  
UNIX is a trademark in the United States and other countries, licensed exclusively through  
X/Open Company Limited.*
