

How to install *Mutanoid Word Challenge...*

1. From the Windows file manager or from DOS, go to your CD-ROM drive and then to the directory:

\MUTWORD

There will be three sub-directories:

\MUTWORD\DISK1

\MUTWORD\DISK2

\MUTWORD\DISK3

2. Copy the contents of each of these three directories to a separate 1.44MB or 1.2MB floppy disk. Label them appropriately.
3. For the installation to work properly the attributes of the files on the disks will need to be changed. (Because the files were copied from a read-only media, CD-ROM, the attributes have changed to Read-Only.)

To change attributes:

From Windows:

- a) From file manager log on to the floppy drive containing the copied files.
- b) At the top left of file manager, select File|Select Files, then Select and close. Next, select File|Properties, click the Read Only box so the box is empty (not X'ed). Click OK.

From DOS:

- a) At the DOS prompt, log on the floppy drive containing the copied files.
 - b) Type: `attrib -r *.* [ENTER]`
4. At the DOS prompt, place Disk 1 in the appropriate drive, log on to that drive and type **INSTALL** to start the installation process.
