Contents

Usage

EasyTip comes with a sample project demonstrating its capabilities.   This project has a form in it called EASYTP32.FRM.   That form is to be used in conjunction with EASYTP32.DLL.

Instructions:

1. Add EASYTP32.DLL to your Visual Basic 4.0 32-bit project through Tools/References.
2. Add EASYTP32.FRM to your project through File/Add File.
3. You must **load** the EASYTP32.FRM at program startup and **unload** it at program shutdown.
4. To add a tooltip for a given control, place the tooltip text in that control's Tag property.

That's it.   When you start your application and rest your mouse over that control, the Tag property text should appear as a tooltip.

Also, be sure to examine the Form_Load event of the EASYTP32.FRM file for EasyTip properties.

Registration

EasyTip can be registered on Compuserve in the Shareware Registration (**GO SWREG**) area.   EasyTip's registration ID is **6789**.

If you prefer to mail payment, please <u>use these instructions</u>:

1. Enclose your email address.
2. Enclose $15.00 in U.S. currency.
3. Send to:
> **Focus Systems**
> **Attn: Cris Williams**
> **3090 Moriah Trails, #105**
> **Memphis, TN   38115**

Questions or comments about EasyTip may be sent to:

> **74451,1245** on Compuserve or
> **74451.1245@compuserve.com** on the Internet
