

SAMPLES.WRI

The samples provided show a variety of examples of spreadsheet use. A brief description of each is provided below. To quickly identify formulas and formatted cells, turn on Cell Type Markers (ShowTypeMarkers property). This is a valuable tool when creating a spreadsheet - cells containing formulas are outlined in red, cells containing data in green, and formatted cells are in blue.

AMORTIZE.XLS

The amortization table at the end of this worksheet calculates the principal and interest payments, ending balance, and cumulative interest for any 48 consecutive payment periods of a loan. It demonstrates the use of named ranges, formulas as names, and a few financial functions.

F1DEMO.VTS

This file contains examples of nearly all of the built in worksheet functions, formatted borders, patterns, fonts, and the various objects available in Formula One.

MERCURY.VTS

A summary page example. The top left section of the worksheet shows a summary of the data contained below. Dropdown list boxes allow the user to make selections about the summary information shown. This example contains a healthy dose of defined names which represent both ranges and formulas.

TAX.VTS

Electronic forms demo that shows a 1993 tax form. The tax table is hidden at bottom right. For optimal printing when using electronic forms, ensure the default font is True Type and ColWidthUnits are Twips.
