Lake Forest Software
LFStatus 32-bit OCX

Introduction

LFStatus can be used in Visual Basic 4.0 32 Bit edition on Windows 95 and Windows NT 3.51. It is much easier to use than building your own status bar from generic controls. It is also very flexible in the information it can display. Various text/numeric indicators can be used for page numbers, line numbers, program states, or whatever you like. In addition, the built in Caps, Num, and Insert indicators are automatically updated without any additional coding. Menu help text can be displayed as the users selects menu items. You can customize the colors used, or let it default to whatever colors are being used it each desktop. International date/time information is automatically displayed in the correct format for each country. The built-in progress bar requires one or two line of code. In other words, IT'S WAY COOL!

Registration

Upon registering, you will receive the 32 bit OCX, full source for the demonstration program, and the design-time license file.

Electronic distribution is free on AOL, CompuServe and MSN. A diskette will cost you additional shipping and handling ($3.50 in the US, Canada and Mexico. $5.00 in Europe, Australia and Asia.)

If you'd like to contact me via E-Mail, you'll get best response through CompuServe at 74361.22@COMPUSERVE.COM, or I can be reached at LakeForest on AOL and the Microsoft Network.

LFStatus can be registered in the following ways.

Send the registration form along with a check or money order for $15.00 to:
Lake Forest Software
7300 N. Mona Lisa #20218
Tucson, Arizona 85741

Please make the check/money order payable to Ed Pantak.

CompuServe: GO SWREG
You can use Visa/Mastercard or whatever method you choose. Prices will be slightly higher.
