**The specified device is not within range.**

Something has moved between the infrared devices or one device has been moved.

Remove the obstruction, or move the device back into range.

**There are no infrared devices within range.**

Make sure that:

- Infrared is enabled.
- Searching turned on.
- The search interval is not too high.
- The device is not too far away.
- The device is IrDA compliant.
- The device is turned on.
- The infrared device is turned on.
- There is nothing blocking the infrared activity.
- There is no dirt or grease on the infrared windows.
- Direct sunlight is not shining on the infrared receiver.
- There are no non-IrDA devices attempting to communicate.

The Infrared Developers Association (IrDA) is a group of computer and software manufacturers who have agreed on a format for communication among infrared devices. The IrDA standard helps ensure that infrared devices from various manufacturers will be able to understand each other.

**The receiving computer is not responding.**

Try the following steps before sending the files again.

- Move the infrared devices closer together.
- Check for partial obstructions of infrared activity.
- Make sure the devices are not moving or vibrating.
- Clean the infrared windows.
- Shade the devices, or turn off bright light.

**The infrared protocol is not responding. The transfer has been aborted.**

Try sending the files again.

**The file could not be opened.**

It may be in use by another application.

Close the file and resend.

**An error occurred while reading the file.**

Try sending the file again. If you continue to receive this error, the file may be corrupted and cannot be sent.

**Your system is too low on memory to complete the operation.**

Close other applications and try the operation again. If you continue to experience problems, try restarting your computer.

**You don't have enough disk space to receive the file. The transfer has been aborted.**

Free disk space and ask the sender to send the file again. Also, try restarting your computer.
