Chapter 1 : Introduction

Welcome to CA-Visual Objects!	1-1
CA-Visual Objects Features	1-2
Visual Programming Tools and a Complete IDE	1-2
A Fully Object-Oriented Language	1-3
Open Database Access	1-4
An Active Repository	1-6
A Native Code, Incremental Compiler	1-6
Reporting with CA-RET	1-7
An Open Architecture	1-7
Where to Go from Here	1-8
In This Guide	1-9
What You Need to Know	1-9
General Typographic Conventions	1-10
Getting Help	1-12

Chapter 2 : Installing and Starting CA-Visual Objects

In This Chapter	2-1
System Requirements	2-1
Installing CA-Visual Objects	2-2
Full Installation	2-3
Partial Installation	2-3
The CA-Visual Objects Program Group	2-5
Before Starting CA-Visual Objects	2-6
Starting CA-Visual Objects	2-7
What's Next	2-8

Chapter 3 : Object-Oriented Programming Concepts

In This Chapter	3-1
Why Object-Orientation?	3-1
The Paradigm Shift	3-2
What Is an Object?	3-4
What Is a Class?	3-5
Inheritance: Superclasses and Subclasses	3-9
A Real-World Example	3-12
Additional Strengths of OOP	3-14
Encapsulation	3-14
Modularity and Reusability	3-15
Summary	3-16
The CA-Visual Objects Libraries	3-17
What's Next	3-19

Chapter 4 : An Overview of the IDE

In This Chapter	4-1
Repository-Based Development	4-1
The IDE Tools	4-3
The Browsers	4-5
Application Browser	4-6
Module Browser	4-7
Entity Browser	4-8
Class Browser	4-11
Error Browser	4-12
The Editors	4-13
Source Code Editor	4-15
Data Server Editors	4-16
Window Editor	4-18

Menu Editor	4-25
CA-RET	4-27
Icon Editor	4-28
The Debugger	4-29
What's Next	4-30

Chapter 5 : Learning the Basics

In This Chapter	5-1
Lesson 1: A Tour of the Standard Program	5-3
Creating an Application: The Three-Stage Process	5-4
Building and Running the Standard Program	5-9
A Tour of the CA-Visual Objects Desktop	5-11
Using the Module Browser	5-12
Using the Application-Wide Entity Browser	5-13
Accessing the Editors	5-14
A Closer Look at the Application	5-15
MDI Application Structure	5-15
The App:Start() Method	5-17
The Shell Window	5-18
The Empty Shell Window	5-23
The Standard Shell Window	5-25
The Child Windows	5-28
Default Event and Error Handling	5-31
A Closer Look at the Standard Program	5-33
The Empty Shell Window	5-33
Opening Database Files	5-36
Switching Between Browse and Form View	5-38
The Standard Shell Window	5-40
Opening Multiple Windows	5-41
Opening SQL Tables	5-43
Summary	5-45

Lesson 2: Setting Up the Data Servers	5-47
Importing the OE Data Servers Library	5-48
A Quick Tour of the Customer Data Server	5-49
Loading the Customer Data Server	5-49
The Indexes List Box	5-52
The Fields Group Box	5-54
Creating the Orders Data Server	5-58
Starting the DB Server Editor	5-58
Importing the Database File	5-60
Importing the Index Files	5-62
Sharing Field Specifications	5-64
Customizing Field Properties	5-67
The FieldSpec Editor	5-68
The Source Code	5-72
Building the OE Data Servers Library	5-74
Adding the Library to Order Entry's Search Path	5-75
Summary	5-76
Lesson 3: Creating a Data Window	5-77
Starting the Window Editor	5-78
Window Properties	5-80
Using Auto Layout	5-82
A Closer Look at the Main Data Window	5-85
A Closer Look at the Sub-Data Window	5-89
Customizing Windows	5-93
Changing Tab Order	5-95
Moving On	5-97
The Source Code	5-97
Summary	5-98
Lesson 4: Modifying the Menu	5-99
Adding the Customer Orders Menu Command	5-100
Previewing Your Work	5-102
Summary	5-104

Lesson 5: Adding the Ordering Methods	5-105
Modifying the Menu	5-106
Adding Commands	5-106
Defining Menu Properties	5-108
Creating the Methods	5-110
The TEXTBLOCK Entity	5-111
The Methods	5-111
Enabling the Menu Commands	5-113
Summary	5-116
Lesson 6: Running the Order Entry Application	5-117
Generating an Executable File	5-117
Running the Application	5-118
Looking at the New Features	5-119
What's Next	5-123
