

GoldMine For Windows Loading Instructions

This GoldMine For Windows Evaluation Copy is a 3 user network version. It is a fully functional version of the system but confined to twenty contact records. The single-user and network versions of GoldMine support contact databases of up to one billion records.

Though you will find the following GoldMine Evaluation program contains US formats, the program supplied by the UK Distributors, AVG Sales & Marketing, is fully anglicised for UK use.

GoldMine provides sales & marketing automation that is powerful, affordable and easy to use. It is recognised as one of the leading contact management software packages on the marketplace and has received much praise in both the computer and business press.

To load GoldMine you must first adjust the following files:

CONFIG.SYS

Files = 120

AUTOEXEC.BAT

C:\DOS\SHARE.EXE /L:500 /F:5100

If on a Novell network then

NET.CFG

File Handles = 125

Set the International clock in your Control Panel to 12 hour, with am and pm entered in the boxes.

Once these options have been set you will be able to use GoldMine fully.

To access GoldMine enter a Username of MASTER and Password of ACCESS.

For your guidance, the program comes with the complete manual on-line along with a context sensitive help facility which can be accessed from the "Help" menu. Here, you may print out the whole, or certain sections, of the manual.

If you experience any difficulties call **AVG Sales & Marketing Ltd** and ask for the Technical Support Desk on **0171-454-1790**.
