# C++Builder

(Screen shot)

*Visual Productivity with the Power of C++*

Get visual productivity with the power of C++ in one Rapid Application Development environment. C++Builder for Windows 95 and NT gives you the speed of **visual drag & drop development**, the productivity of over **100 reusable components** with source, and the flexibility of **scalable database tools**, combined with the power and control of industry-standard C++.

- **C++Builder gives you visual productivity with the unlimited power of C++.** Only C++Builder combines the speed of visual development, the productivity of reusable components and the power of C++.
- **C++Builder places no barriers between you and your code.** With Borland Two-Way Tools, C++Builder lets you maintain control of your code by providing a seamless integration between the visual designers and the code editor. You have the flexibility to use the code editor or the visual designers interchangeably and know that the two are always synchronized.
- **The productivity of Borland's proven Visual Component Library** including more than 100 reusable components with source code—drag and drop Windows 95 common controls, tabbed notebooks, radio groups, data access components, dialogs and more. C++Builder lets you reuse ActiveX controls and VCL components -- subclass them, customize them, or easily create new components.
- **Connect to all your corporate data with scalable database tools** and data aware components. You get complete connectivity to Access, dBASE, Paradox, FoxPro, and ODBC, and native SQL drivers for Oracle, Sybase, Informix, DB2, MS SQL Server, and InterBase.
- **Leverage your existing investment in C++ skills, applications, and code.** C++Builder compiles all ANSI C++ code, including MFC and OWL code. Plus, you can use industry-standard C++ to build fast, productive front ends for your Visual C++ and Borland C++ applications.
- **Get full support for industry standards**, including ANSI C++, Microsoft Windows 95 and Windows NT, the Win32 API, ActiveX, OLE Automation, ODBC, DCOM, MAPI, Unicode, WinSock, ISAPI, and NSAPI.
- **Simplify maintenance and reduce programming time** --visually create new forms from existing ones for a consistent look and feel with Visual Form Inheritance, and easily separate business rules from your application with Data Modules.

- **Increase your productivity with a professional IDE** that includes a visual component palette, fully integrated editor and debugger, comprehensive project manager, CPU view with register panes, disassembly window, flags, and memory dumps, and award-winning Borland C++ compiler technology with new incremental linking for incredibly fast turnaround time.
- **Move seamlessly from prototype to production** with a comprehensive suite of tools including PVCS Version Manager, InstallShield Express, Quick Reports, Visual Query Builder, and InterBase NT for SQL development.
- **Build powerful Web-enabled applications** with the Internet Solutions Pack, and full support for ActiveX, CGI, ISAPI, and NSAPI.
- **C++Builder works within the Borland family of tools to provide unprecedented interoperability.** Leverage the built-in interoperability between Borland C++ 5.0 and C++Builder with complementary project file support, a common compiler with incremental linker, and easy hosting of C++Builder forms in OWL and MFC. And C++Builder lets you reuse Delphi forms, components, source code, and data modules.

|  |   |   |   |
|--|---|---|---|
| Industry-standard C++ language   | ✓ | ✓ | ✓ |
| High-performance, 32-bit, optimizing native-code compiler  | ✓ | ✓ | ✓ |
| Incremental/smart linker for incredibly fast builds  | ✓ | ✓ | ✓ |
| Professional IDE including fully integrated, comprehensive Debugger, Editor, and Project Manager | ✓ | ✓ | ✓ |
| Integrated CPU View and extensive command-line tools   | ✓ | ✓ | ✓ |
| Create reusable DLLs, LIBs, and standalone EXEs  | ✓ | ✓ | ✓ |
| Complete suite of Windows 95 common controls   | ✓ | ✓ | ✓ |
| Complete access to Windows 95/NT APIs for multi-threading, ActiveX, ODBC, DCOM, DirectX and more | ✓ | ✓ | ✓ |
| Full Windows 95/Windows NT support for OLE Automation controllers and servers                    | ✓ | ✓ | ✓ |
| Object Repository for storing and reusing forms, Data Modules, and projects                      | ✓ | ✓ | ✓ |
| Visual Form Inheritance to reduce coding and simplify maintenance                                | ✓ | ✓ | ✓ |
| Visual Component Library (VCL) with over 100 reusable and customizable components                | ✓ | ✓ | ✓ |
| Extensive online help and printed documentation  | ✓ | ✓ | ✓ |
| Component Building Expert to easily build your own reusable components                           | ✓ | ✓ | ✓ |
| Data-aware components for drag-and-drop database applications                                    | ✓ | ✓ | ✓ |
| Data Module Objects to separate business rules from application code                             | ✓ | ✓ | ✓ |
| Database Explorer to visually browse and modify tables, aliases, and indexes                     | ✓ | ✓ | ✓ |
| FREE! Quick Reports to easily create, preview, and print embedded reports                        | ✓ | ✓ | ✓ |
| VCL Source Code and documentation to develop or customize components                             |   | ✓ | ✓ |
| Scalable Data Dictionary to implement and maintain data integrity                                |   | ✓ | ✓ |
| Complete ODBC connectivity   |   | ✓ | ✓ |
| Multi-Object Grid  |   | ✓ | ✓ |
| 32-bit Local InterBase Server for off-line scalable SQL  |   | ✓ | ✓ |

|   |   |   |
|---|---|---|
| development   |   |   |
| InstallShield Express for building professional installs  | ✓ | ✓ |
| FREE! Internet Solutions Pack with eight ActiveX controls to easily create Web-enabled applications                                 | ✓ | ✓ |
| WinSight™ 32 for monitoring Windows messaging   | ✓ | ✓ |
| Open Tools API to integrate your favorite tools   | ✓ | ✓ |
| Team development interface (requires InterSolv PVCS)  | ✓ | ✓ |
| Versatile sample OCXs for charting, graphics, spreadsheet, and spell-checking   | ✓ | ✓ |
| SQL Links native drivers, with unlimited deployment license, for Oracle, Sybase, Informix, DB2, Microsoft SQL Server, and InterBase |   | ✓ |
| SQL Database Explorer to visually manage server-specific meta data  |   | ✓ |
| SQL Monitor to test, debug, and tune SQL applications   |   | ✓ |
| Visual Query Builder to generate bug-free SQL code  |   | ✓ |
| Integrated PVCS Version Manager for team development  |   | ✓ |
| InterBase NT (2-user license) for scalable multiuser SQL development  |   | ✓ |
| Cached Updates to speed up server response time   |   | ✓ |
| Data Pump Expert for data migration, rapid upsizing and application scaling   |   | ✓ |
