

## Unit 1 Level 4 (secret level)

Hi Dave, this is the old way of numbering.

-----

### Strategy 1

Instead of hopping onto the car, turn around and blow away the Enforcer lurking in the corner near the boxes.

### Strategy 2

When you come out of the second secret through the steel door, beware of the Parasite on the top ledge near the ceiling. The moment you step out, it will drop down onto you unless you're prepared.

### Strategy 3

When you climb the staircase for the first time, be cocked and ready because there are many enemies on this secret level. You can take out a good two dozen of them here with the right gear.

### Secret 1

Jump up and across onto the boxes in the first station. Although it's pitch black, feel around for a handy Silencer power-up. This is in the corner where the Enforcers were.

### Secret 2

Before jumping onto the moving car, hop into the water and turn to your left to uncover a secret area with lots of ammo, armor shards, and a rebreather. After walking up the stairs to pick up the objects, press the green button to leave the room back out to the main area.

### Secret 3

While you're descending in the car, step up to the front and jump onto the hidden ledge in front of you (about half way down). Pick up the stimpacks. When you're down, jump into the water and kill all the Barracuda sharks before they pierce your flesh with their razor-sharp teeth.

### Secret 4

While under water, step on the first platform to your left and it will elevated you to a ledge with some power-ups.

### Secret 5

Near the laser traps, quickly pick up the health in the corner and then pull back out to the hallway where it's safe. Then, peer around and shoot the glowing button on the wall above the lasers and enter the small room in the corner that has now been opened for you. Step into the knee-deep water for some armor shards and an adrenaline pack.

### Secret 6

Near the laser trap, head down the flight of stairs and you'll notice a yellow glowing button just above the stairway. Shoot at it and you'll be able to access a ledge with some health, armor shards, and the red key.

#### Secret 7

In the large wide-open room, dive into the water and look for an odd-colored panel on the structure in the middle. Shoot at it, kill the Barracudas, then climb in for some helpful goodies such as Invulnerability, armor, ammo, and health.
