

## Unit 2 - Strategies & Secrets Text

### U2L1W1 Secret

At the very beginning of Level 1, walk forward and jump onto the crate in the left corner. Look up and shoot at the glowing yellow button to open a secret compartment in the wall hiding a quad damage.

### U2L1W2 Strategy

In the second room of Level 1, walk down the stairs backwards to be ready for the Enforcers hiding in the wall. When you press the green button on the wall to open up the next door, also be ready for a slew of Strogg to charge at you.

### U2L1W5 Strategy

Kill all Strogg by staying in the hallway, then look for the glowing yellow button where the elevated Enforcer is. Shoot it to gain access to his room.

### U2L1W5 Secret

When in the small room, press the well-hidden button in the corner to open up a secret basement room with some goodies and an Enforcer protecting it.

### U2L1W7 Secret

In the room with the bridge over the lava pit, crawl under the stairs to find some health and grenades. Turn to the right and step on the green platform to take you back up to the surface.

### U2L1W8 Strategy

While in the room immersed in water, climb onto the boxes to reach the ledge. Then hop to the enclosure with the green button first to open the door on the other side.

### U2L2W1 Secret

Drop down into the large opening and head to the left. Look for a gray panel in the wall - touch it and it'll open up a room with combat armor.

### U2L2W2 Secret

Time it right so you can hop down onto one of the crates and allow it to take you into the hole in the wall. Make sure to duck as you go in to grab the quad damage.

### U2L2W3 Strategy

Once the bad-ass Gunner is dead, press the green button to allow access to the second green button. Pressing this one will de-activate the electricity to the train so you can walk on the tracks.

### U2L2W4 Secret

Shoot the gray area at the bottom of the rust-colored box to uncover a mega-health.

#### U2L2W5 Strategy

Press the green button to activate the lifts. Hop on any of the two sides to elevate to the upper floor.

#### U2L3W2 Strategy

Walk backwards down the corridor so you can take first shot at the Strogg hiding in the wall.

#### U2L3W4 Strategy

Hop onto the vertical crate tram and then walk up the horizontal conveyor belt to the top ledge. Press the green button to bring the explosive box to the door and shoot it to get in.

#### U2L3W5 Secret

On the way down the winding stairs, break through the window and shoot the button behind the crates. This will open up the basement floor containing a bunch of goodies for you.

#### U2L3W5 Strategy

Kill the Tank by hiding behind the crates for protection, using something powerful, and knowing when to run. Repeat the procedure as often as necessary.

#### U2L3W6 Secret

In the last room of the level, shoot the yellow flashing light on the ceiling and climb the ladder to the bonus quad damage.
