

## Security Complex - Level 3

Objective - locate red security card, then proceed to security pyramid.

### U3L3W1 (secret)

When you enter this level, there will be a Strogg in the middle of the area outside, overlooking a human prisoner. Kill him first then enter the dark gray door to the left to grab the gold combat armor. You will not be able to enter the passageway which is blocked by yellow laser, but if you shoot that plate in the wall near the laser, it will open up to uncover a secret - a grenade launcher. Now head back outside.

### U3L3W2

Go straight into the cave area and destroy the medic. You will not be able to further explore this area either so head back outside again and enter the largest of the doors at the base of the slightly elevated path.

### U3L3W3 (Two Strategies)

In the large room, take your shots, and duck back behind the walls for cover. This is the only way you'll be able to take on all of these enemies at once. Walk upstairs and pick up all the goodies. Walk outside which overlooks pyramid, grab the chaingun and the red key. Go back downstairs now two levels, grab some health and the bandoleer from under the stairs, and crawl into the metal barrel to snag the quad damage.

### U3L3W4

Exit outside, along the green-tinted walls toward the pyramid structure and touch the button. The pyramid will open and out will fly an Icarus from the center. Destroy it and hop down into the pit yourself (or step on the platform there if its up). Grab the hyperblaster weapon and any health you may need. Don't touch the glass door just yet - this is to Level 4 - the Torture Chamber - so that you may locate the security pass. Instead, now that you've got the red key, go back to the Detention Center and unlock the yellow security grids. Follow your steps back, and exit the way you came in.

### U3L3W5

When you return from the Detention Center for the second and last time, head to the dark gray door on the left, where you weren't able to enter previously. Follow it along until you're outside again and make sure to bury the Tank on the platform above you. Pick up the power-up stash in the corner but don't enter the new doorway - this will take you to Level 5 - the Guard House - but we're not quite done here yet.

### U3L3W6

Exit back where you came in and head straight down into the mouth of the cave. Kill the Tank, then tap the red computer panel in the wall to lowering the bridge across the lava pit. Watch out for a hovering Icarus or two. Once across, enter the doorway and proceed down the steps to the bottom. Kill the Tank and Berserkers and go upstairs where they are torturing a human to grab the health pack in the corner. Once back down, the doorway to the right will lead to the level 4 - the Torture Chambers. Enter here.

### U3L3W7 (strategy)

After completing the Torture Chambers, head straight for the dark gray door (opposite the cave opening), but watch out - there will still be a handful of Strogg left on this level. Enter the gateway to Level 5 - the Guard House - in order to get the pyramid key.

U3L3W8

After returning from the Guard House, head toward the security pyramid, and enter the final platform, taking you to Grid Control - the boss level, number 6.
