

## Unit 4 - Level 4 - Drilling Area

The objective is to lower the access bridge and find the service elevator to the Factory.

### U4L4W1

Step into the dark and grab some health and a silencer. Look down and destroy everything moving. To break your fall, hop onto a computer, and then down. Press the lever in the middle of the room to lower the bridge.

### U4L4W2 (strategy)

Enter through the passageway with the red glow and take out all guards and Gunners. Before attempting the crushing door area, crouch down and shoot at the feet of the Strogg on the other side. Now you can take your time watch the timing of the doors and grabbing the Super Shotgun. Plus, there will be another Gladiator on the other side to contend with.

### U4L4W3 (strategy)

Follow along this underground passageway, until you come to a set of stairs. Look underneath for many health packs and combat armor. Head up the stairs and exit the door on the left. This is all there is to do on this level for now.

You will appear back in the Borehole level (see "Level 3" to continue along with the text).

### U4L4W4 (strategy)

After returning from the Borehole for the second time, you are now in a new section of the Drilling Area level. Shoot the Gunners in the back while avoiding their grenades. Then fire at the red power cells on the wall to lower the grid, allowing access underground.

### U4L4W5 (secret)

Enter the underground caves and at your turn, on your right, you'll notice a small crack in the wall. Shoot it to uncover a secret. Keep going into the caves to an area crawling with Mutants. Use your rockets again to rip 'em a new one and then snag the combat armor in the corner. Keep going deeper into the caves. You will enter a room with a large drill in the middle. Hit the lever and watch the laser create an opening for you to the lower mines. Hop in!

### U4L4W6

After your brief stay in the lower mines, you are now back here for your final visit. Pick up the hyperblaster and health and continue across the small bridge to the mouth of the cave. One or two Tanks will stand in your way, though, so take them out one by one. Head back into the caves if necessary to switch weapons.

### U4L4W7 (secret)

On top of one of the ledges is an adrenaline power-up. Use the containers to hop onto a crate to get it. If need be, push a container over to that side of the room or shoot a rocket at your feet to blow yourself up there. Enter the cage in the middle to exit Unit 4.
