

Unit 6 - Level 7 - The Big Gun

Objective: eliminate all resistance and destroy the Big Gun.

U6L7W1

Do not enter the doorway to the left or a giant pillar will take your head off. Pick up the health scattered around and the combat armor on top of the crate.

U6L7W2

Exit this room, into a larger one with a steedium crystal rising in the center. Make sure to pick up the armor shards and even more health - the kind people who made this game are trying to tell you something. None of the doorways out of here are accessible so arm yourself well and step on the small platform up.

U6L7W3 (strategy)

If you don't hurry, Flyers and the level drone boss will start shooting at you. Once on top, duck behind the pillars to protect yourself from the flying Strogg drone and kill it once and for all.

U6L7W4

Lock down the laser guard next by dropping down and entering the door with the red square on it. Kill all guards and enter from either platform. Walk upstairs another small level and press the button to lock down the lasers. You must now evacuate within 10 seconds or so before the explosion. Quickly follow your steps back to the beginning and leave through the door marked "exit". You are now finished with Unit 6.
