

Hot CPU Tester Pro Version Changes History

Change from Version 3.4.2 to Version 4.0

- Completely redesigned from scratch
- Fully compliant with AMD Athlon™ 64 & AMD Opteron™
- Fully compliant with Hyper-Threaded processors
- Fully compliant with multi-processor systems
- New **DefectTrack v2.0**(formerly known as **DefectTech**)
- New test methods: Sequential & simultaneous
- Ability to generate debug dump to fully analyze the problem
- New test module added: Fast Fourier Transform
- New test module added: Sorting Algorithms consisted of 6 different sort algorithms
- Most test modules can be customized
- Comprehensive Synthetic Benchmark
- Burn-in CPU & Memory options
- New interface & look

Change from Version 3.4.1 to Version 3.4.2

- Fixed bug: Problem with Complex Matrix progress bar
- Fixed bug: Problem with Prime Test progress bar
- New eSellerate engine v3.0.1.4

Change from Version 3.4 to Version 3.4.1

- Does not need Windows Accessibility feature installed (OLEACC.DLL)

Change from Version 3.3 to Version 3.4

- Improved module: QuickSort
- Improved module: Peripherals
- New eSellerate engine v2.1
- Minor tweaks & bugs fixed

Change from Version 3.2 to Version 3.3

- New **DefectTech v1.2** with heuristic algorithm
- Added **Burn-in** feature in the options menu
- Redesigned module: Complex Matrix
- Improved module: Chipset
- Improved module: L1 Cache
- Improved module: MMX
- Improved module: SSE
- Improved module: 3DNow!®
- Fixed bug: can detect 'Copper mine' Pentium® 3
- Minor tweaks & bugs fixed

Change from Version 3.1 to Version 3.2

- Improved core
- Improved module: Pi test
- Improved module: Memory
- Improved module: Chipset (*Pro version*)
- Automatic update for registered users
- Fixed bug: AMD® 3DNow! ®Benchmarks
- Minor tweaks

Change from Version 3.0 to Version 3.1

- **DefectTech v1.1** can detect a wider range of errors and illegal instructions
- Improved module: QuickSort

- Improved module: Chipset
- Some minor improvement
- Some fixed bugs

Change from Version 2.0.2 to Version 3.0

- Completely redesigned & rewritten
- Uniquely designed **DefecTech** technology for more accurate diagnostic
- New module: QuickSort
- New module: Peripherals
- All modules are redesigned & improved to comply with our **DefecTech** engine for best accuracy
- Logging feature added
- New LiveSupport feature with full technical support
- AutoUpdate feature added
- New libraries & instructions set added for Intel® Pentium® 4 and AMD Athlon XP™
- Instruction sets are chosen automatically
- Supports Microsoft® Windows XP®
- New interface & look
