

Welcome to QuickTime 6.4

QuickTime is Apple's award-winning, industry-leading software architecture for creating, playing and streaming digital media for Mac OS and Windows.

QuickTime 6.4 provides support for iTunes 4 as well as performance enhancements.

For more information about QuickTime, please visit the QuickTime web site at <www.apple.com/quicktime>. The QuickTime web site also provides many links to cool QuickTime content and to other Internet sites that showcase QuickTime.

System Requirements:

QuickTime 6.4 requires Windows 98, Windows Millennium Edition (aka Windows Me), Windows 2000 or Windows XP. It requires an Intel Pentium or compatible processor and at least 128 MB of RAM.

About Roland's Sound Set for General MIDI and GS Format

This release of QuickTime includes an instrument sound set licensed from Roland Corporation that makes a complete General MIDI compatible sound set. It also includes additional sounds necessary to make a complete GS Format compatible sound set.

What is the GS Format?

The GS Format is a standardized set of specifications for sound sources that defines the manner in which multitimbral sound generating devices will respond to the MIDI messages. The GS Format complies with the General MIDI System Level - 1. The GS Format also defines a number of other details over and above the features of General MIDI. These include unique specifications for sound and functions available for tone editing, effects, and other specifications concerning the manner in which sound sources will respond to MIDI messages. Any device that is equipped with GS Format sound sources can faithfully reproduce both General MIDI sound recordings and GS Format MIDI sound recordings.

How to contact Roland:

Roland Corporation
4-16, Dojimahama 1-chome,
Kita-ku, Osaka 530-0004, Japan
