About the game

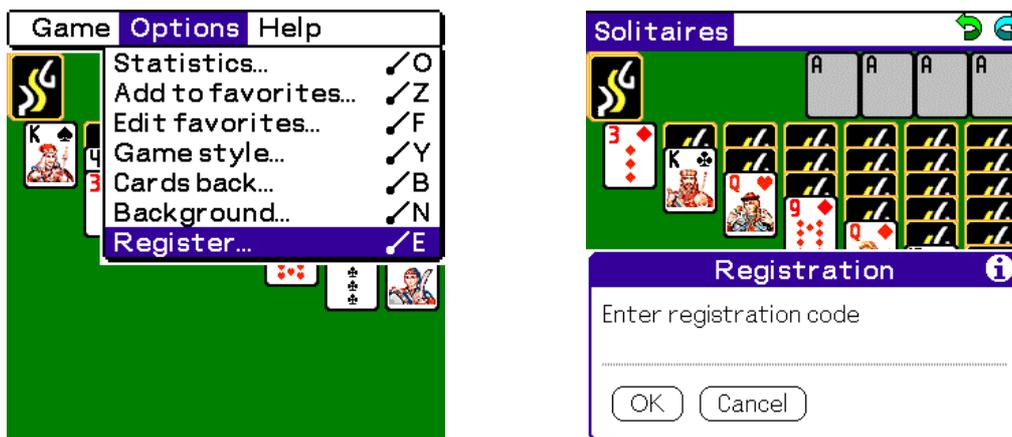

We are glad to offer you a unique collection of solitaires – more than 200 solitaires are gathered in one game “One for all Solitaires Collection”. If you are fond of card games, this collection gives you a great possibility to play a new solitaire every day. You can add your favorite games to the “Favorites” group and start them quickly any time you want to cheer up.

System requirements

The game is designed for devices with Palm OS 3.0 and higher. There are three different versions of the game: for devices with low-resolution screen (for both black-and-white and color screens), for devices with high-resolution color screen, and for devices with high-resolution grayscale screen.

Registration and demo-version limitations

The longer you play the unregistered game, the more often you see the message about registration procedure when starting a new solitaire. To register your copy of the game you should enter the registration code in the following dialog: menu “Options>Register...”

You can get the registration code after buying the game.

Installation

1. Back up all data from your mobile device to your desktop PC or to extension card.
2. Run the Palm Desktop program on your desktop computer (the Palm Desktop icon is on the desktop). Then click the Install Tool icon in the Palm Desktop window.

3. In the appeared window choose one of the following files that suites your device.
 - SLT_color.prc - color version for devices with high-resolution screen;
 - SLT_gray.prc - grayscale version for devices with high-resolution screen;
 - SLT_low-res.prc - version for devices with low-resolution screen.

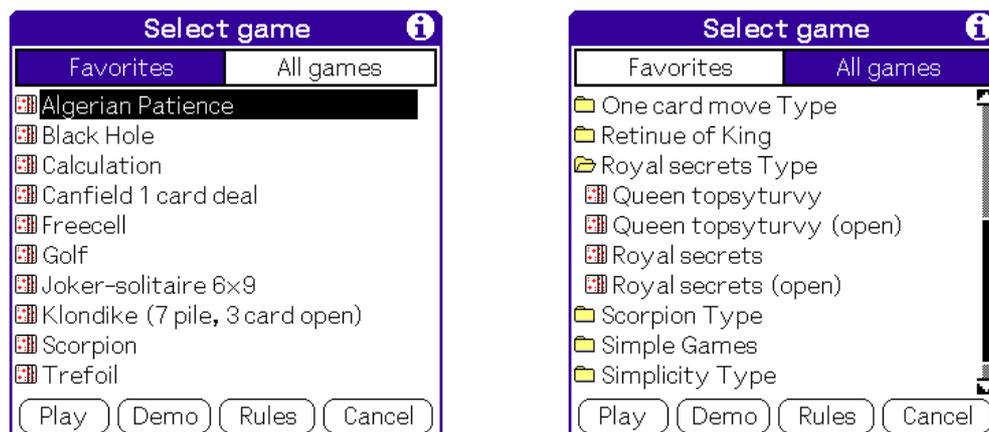

4. To add a file into the Install Tool window you should drag-&-drop the file there or press the Add button and set location of the file you want to add.
5. Press the Done button.
6. Synchronize your device with the desktop computer using the HotSync program. After synchronization solitaires collection will be installed.

How to play

Main game menu

If you start the game, first of all you will see the splash-screen. Then you will proceed to the main game menu. It looks like in the picture below.

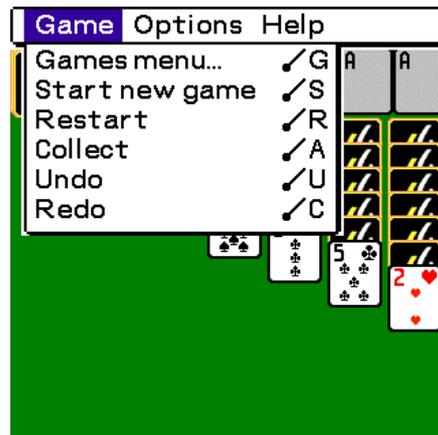

In the main game menu there are two sections and four buttons.

- The most popular games are listed in the “Favorites” section. You can change this list by adding your favorite games to it.
- All available solitaires are listed in the “All games” section. Solitaires with similar rules are gathered in separate folders.
- To open a solitaire you should select it in the list and tap the “Play” button.
- To look at the demonstration of any solitaire you should select it and tap the “Demo” button.
- To read the rules of the selected solitaire please use the “Rules” button.
- To exit the main game menu please use the “Cancel” button.

Game menu

In each solitaire there is a menu of three sections. To open the menu you should tap the “Menu” icon in the Graffiti field. The other way to open any menu item is to use the special Graffiti stroke  and the appropriate letter.

The first menu section – “Game”

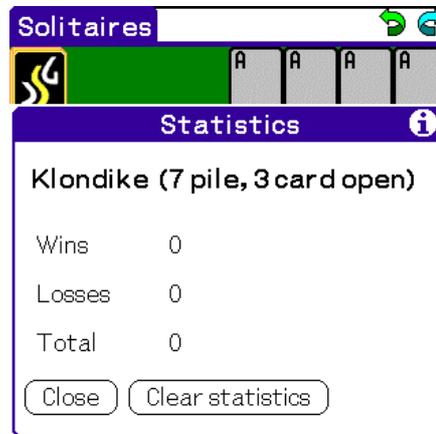

- If playing a certain solitaire you want to open another one, use the item “Game>Games menu...”
- To deal once again in the current solitaire, use the item “Game>Start new game”.
- All cards can be moved to suitable positions by tapping the item “Game>Collect”.
- To undo the latest move use the item “Game>Undo”. Using this menu item you can cancel any number of your moves one by another. You can also use the button .
- To redo the latest move use the item “Game>Redo” or tap the button .

The second menu section – “Options”

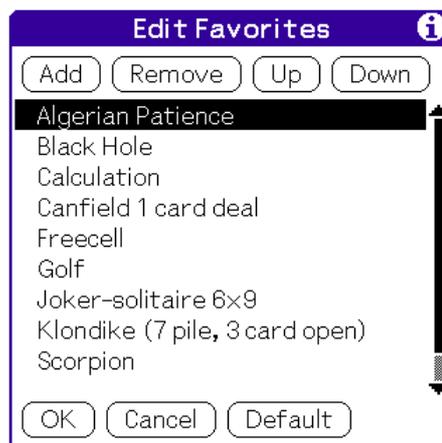

- To see statistics of the current game use the item “Options>Statistics...” In the appeared window you will see how many times you have played the current solitaire, how many times you have won and lost the game.

Tap the “Close” button to close this window and the “Clear statistics” button to clear statistics of the current game.

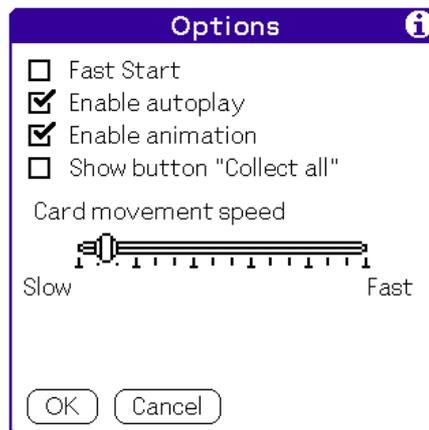

- To add the current solitaire to Favorites use the item “Options>Add to favorites...”
- The menu item “Options>Edit favorites...” is designed to edit the “Favorites” list.

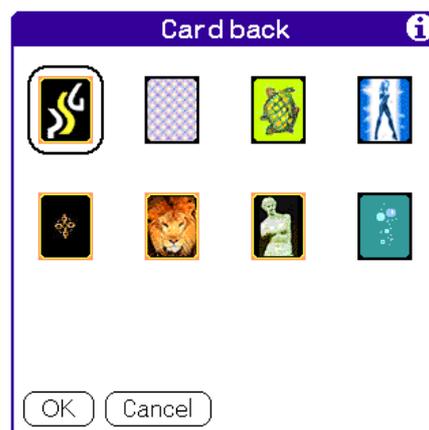

In this window you can do the following:

- Add the current solitaire to “Favorites” – the “Add” button;
- Remove the current solitaire from “Favorites” – the “Remove” button, but if the current solitaire is the only game in “Favorites”, you will not be able to remove it;
- Change games sequence – the buttons “Up” and “Down”.
- To apply changes tap the “OK” button.
- To cancel changes and exit the current window tap the “Cancel” button.
- To restore the list of “Favorites” tap the “Default” button.

- To change game settings use the item “Options>Game style...”

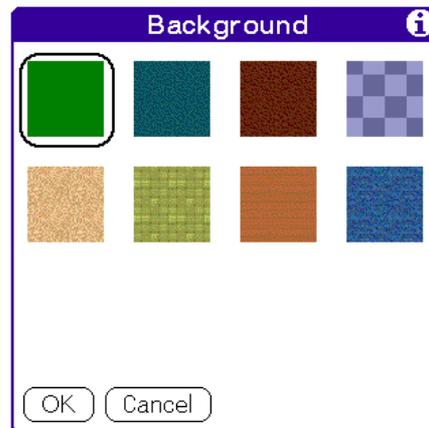

- To switch off animation of cards dealing you should put a tick near the item “Fast Start”.
 - To switch on automatic cards moving to suitable positions you should put a tick near the item “Enable autoplay”.
 - To switch on animation of cards moving you should put a tick near the item “Enable animation”.
 - To show the button “Collect all”  in the button panel you should put a tick near the item “Show button “Collect all””.
 - To tune the speed of cards moving use the slider “Card movement speed”.
 - To apply changes tap the “OK” button.
 - To cancel changes and exit the current window tap the “Cancel” button.
- If you open the menu and tap “Options>Cards back...” you will be able to choose one of 8 available card backs.

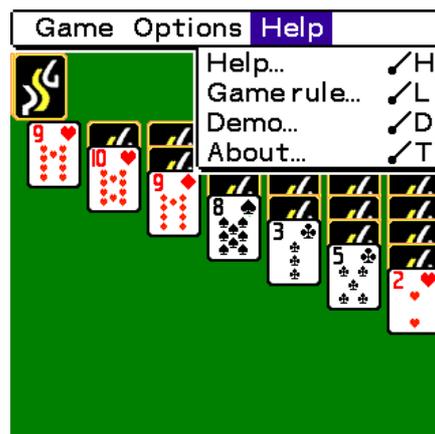

- Select a back you like and tap the “OK” button.
- To cancel changes and exit the current window tap the “Cancel” button.

- To choose a background color use the item “Options>Background...”

- To apply the selected background tap the “OK” button.
- To cancel changes and exit the current window tap the “Cancel” button.

The third menu section – “Help”

- To read help about general game features use the item “Help>Help...”
- To read the rules of playing the current solitaire use the item “Help>Game rule...” Solitaire rules are available only in English.
- To see the demonstration of the current solitaire, use the item “Help>Demo...” To exit demonstration tap at any place on the screen.
- Some the information about this game is available in the window, which opens after tapping the item “Help>About ...”

Card moving

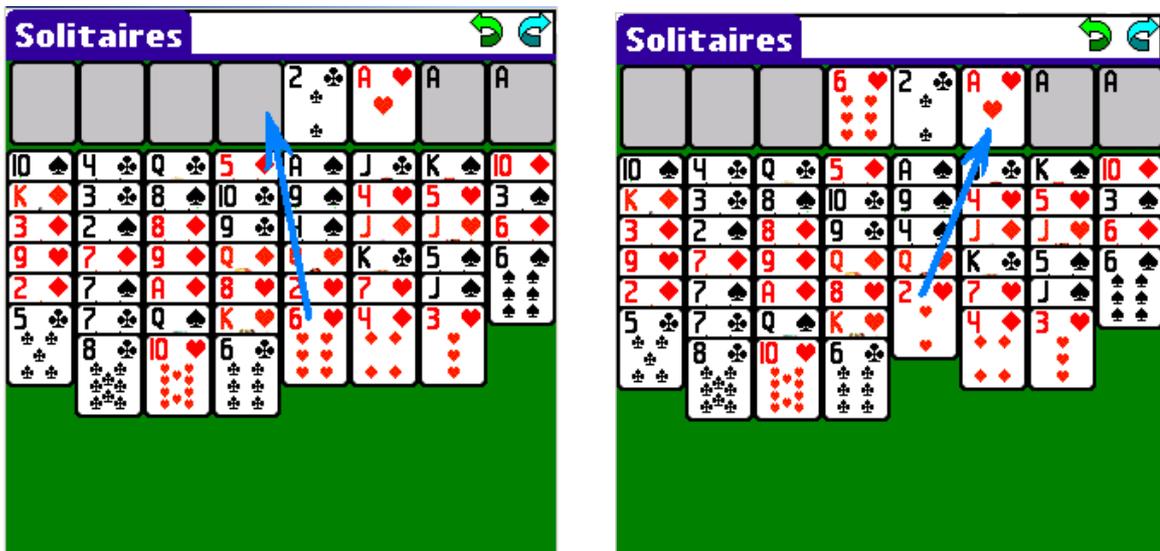

To move a card or a pile of cards you should tap and drag it to a new place (without raising the stylus from the screen).

Quick card moving

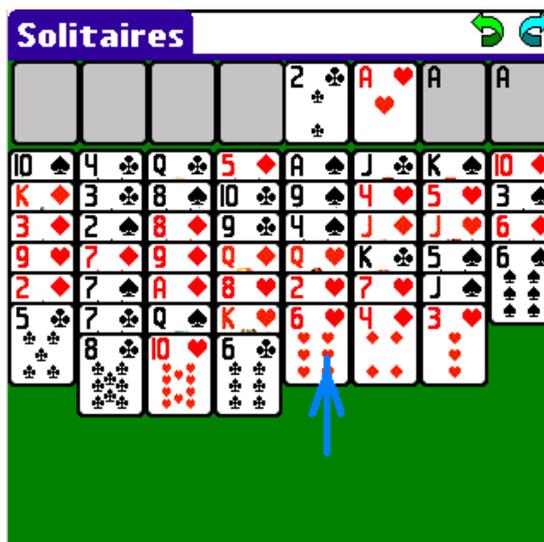

You can also perform quick card moving. To do this, tap once a card or a pile of cards. The program will automatically move the card(s) to suitable positions. Sometimes there are several suitable positions to move the card(s) to and the program may use any of them. If you expected a card to be moved to another position, just tap this card again and it will be moved there automatically.

Complex card moving

- Let us take an example. While playing one of “Freecell” solitaires you want to move two cards (one after another) to suitable positions. In this case you should move the first (upper) card to a vacant position (free cell) in the top line first, the second card – to a position you want, and then the first card to a position you want.

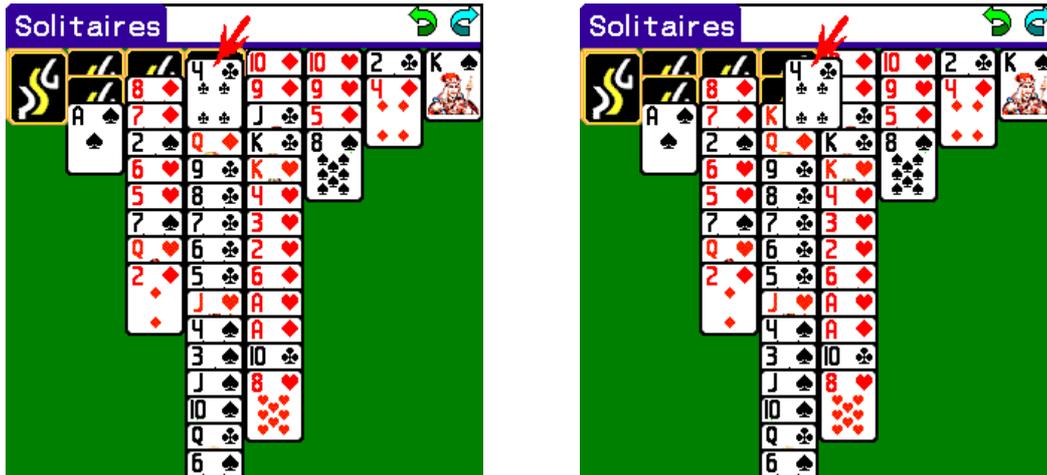

The program can perform all this sequence of actions instead of you. Just tap the first card by the stylus.

- All cards can also be moved to suitable positions by tapping the menu item “Game>Collect”.

Long piles of cards

If you have built up a long pile of cards on the screen, the long pile will be stacked into several layers so that last cards will be shown above first cards. To see cards placed under the upper layer you should tap the upper layer by stylus and it will move to the right for some time. Tap the moved aside card(s) again to move them back.

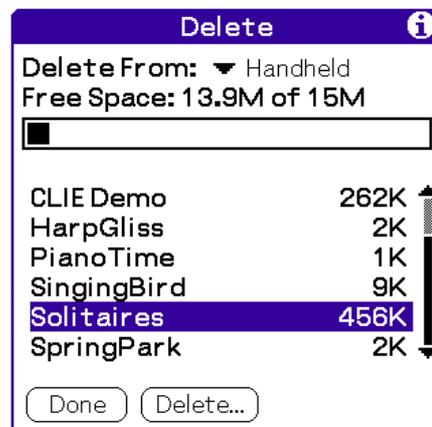

Game exit

To exit the game any time you wish, tap the “HOME” icon in the Graffiti field, please. The current game will be saved and will be restored when you start the game again.

Uninstallation

To completely uninstall the game “One for all Solitaires Collection” from your device you should go to the “Applications” screen, open the menu and tap “App > Delete”. Then select “Solitaires” and tap the “Delete” button.
