Installation Instructions for the Windows 95/98/NT

- 1.) Make sure you have a web browser installed onto your system. (I.e....Netscape or Explorer 4.0 or Higher.) If you already have a browser please go to step 4. NOTE\* We suggest using Netscape 4.0 or higher. The reason is that we have found out that Netscape seems to run the movies a little faster. If you would like to install Netscape please go to the next step.
- 2.) If you do not have a web browser on your system please install the Netscape browser that is already on the CD. It is located in the Netscape Folder; just double click on the file named "netscape46". This will launch and install Netscape 4.6 onto your system. Just follow the instructions on the screen.
- 3.) After you have installed your web browser go back to the CD using the "My Computer" icon that is located on your desktop or you can go through your Windows Explorer. When you open up the CD you need to install QuickTime 3.0, which is located on the CD. Double click on the file named "Qt3". This will Launch and install QuickTime 3.0. Please Skip Step 4. NOTE\* You must install QuickTime 3 or 4 after you have installed your browser. The reason for this is that QuickTime needs to install a Plug-in into your web browser. If not then your movies will not play.
- 4.) If you already have QuickTime 3.0 or Higher then you can skip this step. If not then you will need to install QuickTime 3.0 or Higher. You can install QuickTime 3.0 from the CD. First Go to the "My Computer" located on the desktop or you can go through Windows Explorer. Open the CD and find the file called "Qt3". This will launch and install QuickTime 3.0.
- 5.) After you have your web browser up and your QuickTime then you can proceed to view the movies. First you need to go back to the CD either using "My Computer" or "Windows Explorer". There you will find a file name called "clickme". Double click on this file and it will launch your browser.
- 6.) There you will find a page with a button called "Launch The VTC Movie Player". Click on this button. NOTE\* Sometimes it will ask you if you want to close the window just click "yes" or "OK".
- 7.) After that step another window will appear in the top left hand corner of your screen. These are the movies. The names in the Blue will be the movies just click on the link and the movie should appear beside you little window.

\*NOTE If you are experiencing difficulties please visit our web site <http://www.vtco.com> and go the Tech Support page. Most of your questions can be answered there. If you do not find your answer please give our Tech Support a call Toll Free at 1-888-TRAIN CD. If you are in the Canada area the Toll Free number will not work please call 1-540-545-8060.
