

The Arts & Letters SpaceAGE Guided Tour

Welcome to the Arts & Letters SpaceAGE Guided Tour. Along the way you will see and hear some of the more spectacular sights and sounds of this award-winning multimedia encyclopedia. Endorsed by The National Space Society and featured on CNN Future Watch, SpaceAGE was selected as "Best Space CD" by CD-ROM World Magazine.

SpaceAGE is one of the Arts & Letters EXPO products combining multimedia, drawing and clip art, all on a single CD.

INSTALLATION INSTRUCTIONS

The Guided Tour is installed automatically whenever you install the Arts & Letters EXPRESS Guided Tour or Arts & Letters DRAW.

The Guided Tour runs almost entirely from the CD; only Video for Windows must be installed on your fixed-disk drive. Installing Video for Windows is optional. If you skip the option, the Guided Tour will skip the video segments.

To Run the Guided Tour of Arts & Letters SpaceAGE

Click on the SpaceAGE Guided Tour icon in the Arts & Letters program group to start the tour of SpaceAGE.

Using SpaceAGE on a 16-Color Monitor

SpaceAGE is intended to be played on a color monitor and card that support 256 colors or better. However, SpaceAGE can be played and used on a monitor and card that support only 16 colors.

A 256-color image will appear washed out when played in 16 color mode. If the images are not brilliant and crisp and you know you have at least a 256 color monitor and card, refer to your monitor and card User Guides to select and change drivers.

Optimizing SpaceAGE Video Clips

SpaceAGE Theater video clips are of the highest quality that technology and allowances for disk space afford today. Here are a few tips to get the best quality video reproduction.

- a. Open the Control Panel in the Windows Program Manager.
- b. Select the driver called MPEG Decompressor for Microsoft AVI.
- c. Select Setup.
- d. In the scrolling list of drivers for video display cards, select the one that matches your card. Once you have chosen the appropriate driver turn off the selection for DIB Mode on the right hand side of the dialog box. If there is none available leave the setting for DIB mode on (default, this will work on all card/monitor combinations). If you are not sure of the make of your card, contact your card manufacturer for information.

TECHNICAL SUPPORT

If you have any questions, contact one of the distributors listed below. If there is no distributor for your country, write or fax:

Computer Support Corporation
15926 Midway Road
Dallas, Texas 75244
Tel: 214-661-8960
Fax: 214-661-5429
Hours: 8:30 am to 6:30 pm, CST.
