```
\X     /WGC12~
       {PGDN}{PGDN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN
       /M{PGDN}{PGDN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}~
       {HOME}{RIGHT}~
AGN    {END}{DOWN}
       /M{PGDN}{PGDN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}{DOWN}~
       {HOME}{END}{RIGHT}{RIGHT}~
       {BRANCH agn}~
```

| If a MIXED file, combine col A and B into C using the string
| functions, convert col C to fixed values and delete col A
| and B -- then file combine the macro into the spreadsheet.
|
| To combine the mixed calls of two columns into one, copy the
| following formula into the third column. Convert the third
| column to fixed values and then delete the first two columns.
|
| @IF(@LEFT(A1,1)>"1",+A1,+B1)
|
| Install the macro on row 1 to the right of the last column
| you think it will need. It produces columns of 50 calls.
| Do a Range Name Label Right to pick up \X and AGN.
| Run the macro "Alt-X" against the newly created column of
| combined calls. It ends by hitting row 8192. Use
| CTRL-BREAK and ESCAPE to end the macro.
