Max's Toolbar for Delphi 1.0

(C) Maxim V. Shiryaev, 1995

Before using this program please read the <u>license agreement</u>.

This simple program adds a floating toolbar with buttons missed from the Delphi's IDE. You can place it anywhere you want and click its buttons to make the following:

Button	**Menu Equivalent**
Cut Edit|Cut	
CopyEdit|Copy	
Paste	Edit|Paste
Undo	Edit|Undo

Also you can insert some OP language constructions in your source code.
The style of the source code formatting implies **`begin...end`** operator inside any other.

Here is the main window: (Click on any element to get help on it)

Click this button to cut a text to clipboard (Equivalent to Edit|Cut)

Click this button to copy a text to clipboard (Equivalent to Edit|Copy)

Click this button to paste a text from clipboard (Equivalent to Edit|Paste)

Click this button to undo previous operation (Equivalent to Edit|Undo)

Click to insert

```
begin

end
```

Click to insert

repeat

until

Click to insert

```
while ..do begin

end;
```

Click to insert

```
case .. of
:
else

end;
```

Click to insert

```
if .. then begin

end;
```

Click to insert

```
for .. := .. do begin

end;
```

Click to insert

```
function ..() : ;
begin

end; {    }
```

This button closes the Toolbar

Click to minimize the Toolbar's window.
Attention! For some reason you should doubleclick the icon's CAPTION to restore the window back.

You've just clicked it since you're reading this help?

Max's Toolbar for Delphi

(C) **Maxim V. Shiryaev**, 1995.

To contact: E-mail: **maxim@mephi.ru**

This product is **freeware**. You can use and distribute it free.

If you like this program send a e-mail message to author and say wether you are ready to pay $5...$10 for the next version, which will contain macro recoder/player. After 50 such messages I will release a shareware version.

This means:

```
while .. do begin

end;
```

but not simply `while .. do ..;`

and so on
